Marxism Beyond Marxism Saree

Makdisi, Cesare Casarino, Rebecca Karl, 2012-11-12 These essays critically rethink Marxism in the light of the disintegration of communist regimes Eastern Europe and the Soviet Union Containing essays from a group of internationally distinguished writers and intellectuals this collection addresses Marxism as a cultural political problematic Contending that Marxism is deeply embedded in specific cultural practices the contributors illuminate Marxism's contribution to discussions of labour in post industrial capitalism to controversies surrounding compulsory heterosexuality and queer theory and to debates about the institutionalization and academicization of the New Left In examining Marxism's relationship to cultural practices the contributors make a case for Marxism's continued relevance By combining a diversity of perspectives these essays

demonstrate that Marxism addresses urgent needs that are often forsaken by other political and ideological practices They show how now more than ever Marxism's reaffirmation can serve as a sophisticated and cunning response to the latest global developments and travesties Beyond Marx , 2013-11-21 Capitalism has proven much more resilient than Marx anticipated

and the working class has until now hardly lived up to his hopes The Marxian concept of class rests on exclusion Only the pure doubly free wage workers are able to create value from a strategic perspective all other parts of the world's working populations are secondary But global labour history suggests that slaves and other unfree workers are an essential component of the capitalist economy What might a critique of the political economy of labour look like that critically reviews the experiences of the past five hundred years while moving beyond Eurocentrism In this volume twenty two authors offer their thoughts on this question both from a historical and theoretical perspective Contributors include Riccardo Bellofiore Sergio Bologna C George Caffentzis Silvia Federici Niklas Frykman Ferruccio Gambino Detlef Hartmann Max Henninger Thomas Kuczynski Marcel van der Linden Peter Linebaugh Ahlrich Meyer Maria Mies Jean Louis Prat Marcus Rediker Karl Heinz Roth Devi Sacchetto Subir Sinha Massimiliano Tomba Carlo Vercellone Peter Way Steve Wright **The Production**

of Subjectivity: Marx and Philosophy Jason Read, 2022-04-11 Louis Althusser argued that Marx initiated a transformation of philosophy a new way of doing philosophy This book follows that provocation to examine the way in which central Marxist concepts and problems from primitive accumulation to real abstraction animate and inform philosophers from Theodor Adorno to Paolo Virno While also examining the way in which reading Marx casts new light on such philosophers as Spinoza At the centre of this transformation is the production of subjectivity the manner in which relations of production produces ways of thinking and living **The Bloomsbury Companion to Marx** Andrew Pendakis, Imre Szeman, Jeff

Diamanti, 2018-12-27 There are very few figures in history that have exerted as much and as varied an influence as Karl Marx His work represents an unrivalled intervention into fields as various as philosophy journalism economics history politics and cultural criticism His name is invoked across the political spectrum in connection to revolution and insurrection social justice

and economic transformation The Bloomsbury Companion to Marx is the definitive reference guide to Marx's life and work Written by an international team of leading Marx scholars the book offers comprehensive coverage of Marx's life and contexts sources influences and encounters key writings major themes and topics and reception and influence The defining feature of this Companion is its attention to the new directions in Marxism that animate the theoretical scientific and political sides of Marx's thought Gender and the growing importance of Marxist feminism is treated as equally important to clarifying Marx today as traditional and diverse categories of critique such as class capital and mode of production Similarly this Companion showcases the methodological and political importance of Marxism to environmentalist politics Finally the volume examines in detail non European Marxisms demonstrating the centrality of Marxist thought to political movements both within and beyond the global north This book is the ideal research resource for anyone working on Marx and his ideas today and as an entry point if you are approaching Marx's thought for the first time **Another Marx** Marcello

Musto,2018-05-03 Following the break up of the Soviet Union Marx was regarded as a thinker doomed to oblivion about whom everything had already been said and written However the international economic crisis of 2008 favoured a return to his analysis of capitalism and recently published volumes of the Marx Engels Gesamtausgabe MEGA2 have provided researchers with new texts that underline the gulf between Marx's critical theory and the dogmatism of many twentieth century Marxisms This work reconstructs with great textual and historical rigour but in a form accessible to those encountering Marx for the first time a number of little noted or often misunderstood stages in his intellectual biography The book is divided into three parts The first Intellectual Influences and Early Writings investigates the formation of the young Marx and the composition of his Parisian manuscripts of 1844 The second The Critique of Political Economy focuses on the genesis of Marx's magnum opus beginning with his studies of political economy in the early 1850s and following his labours through to all the preparatory manuscripts for Capital The third Political Militancy presents an insightful history of the International Working Men's Association and of the role that Marx played in that organization The volume offers a close and innovative examination of Marx's ideas on post Hegelian philosophy alienated labour the materialist conception of history research methods the theory of surplus value working class self emancipation political organization and revolutionary theory From this emerges another Marx a thinker very different from the one depicted by so many of his critics and ostensible disciples The Palgrave International Handbook of Marxism and Education Richard Hall,Inny Accioly,Krystian

Szadkowski,2023-11-07 The Palgrave International Handbook of Marxism and Education is an international and interdisciplinary volume which provides a thorough and precise engagement with emergent developments in Marxist theory in both the global South and North Drawing on the work of authoritative scholars and practitioners the handbook explicitly shows how these developments enable a rich historical and material understanding of the full range of education sectors and contexts The handbook proceeds in a spirit of openness and dialogue within and between various conceptions and traditions

of Marxism and brings those conceptions into dialogue with their critics and other anti capitalist traditions As such it contributes to the development of Marxist analyses that push beyond established limits by engaging with fresh perspectives and views that disrupt established perspectives

Marx Worldwide Jan Hoff,2016-11-21 In his study Jan Hoff charts the unprecedented global boost that has been experienced by critical Marxism since the mid 1960s In particular Hoff shows the development of interpretations of Marx s method of critical social theory oriented towards Marx s critique of political economy and of significant disputes concerning the different versions and iterations of the critical project that ultimately culminated in Capital His book investigates the globalisation of Marx debates the complex network of international theoretical approaches that have been devised between the poles of science and politics the transfer of theory and the historical development of schools of thought beyond national and linguistic borders Marx Worldwide provides an overview of Marx reception in various regions of the world in which the extra European process of theory formation receives particular attention and it shows how despite the supersession of Marxism in the sense of an all encompassing worldview the Marxian aim of providing an explication of the internal connection of economic categories and relations and thereby of accomplishing the de mystification of the deranged world of the economy is as relevant and as theoretically important as it has ever been First published in German by Akademie Verlag as Marx Global Zur Entwicklung des internationalen Marx Diskurses seit 1965 Berlin 2009

The Rest and the West Sandro Mezzadra,Brett Neilson,2024-11-12 In the wake of a pandemic that tested economies and societies geopolitical conflict has taken on a new intensity The Rest and the West locates the origins of this development in the turbulent dynamics of the capitalist world market Rather than reducing global conflict to a matter of great power rivalries or the process of economic decoupling Sandro Mezzadra and Brett Neilson investigate the increasing centrality of war to capital operations and to the transformation of capital ism The goal is to forge a theory of imperialism adequate to a world in which the rest no longer provides a putative unity that defines and opposes the West

Constituting Feminist Subjects Kathi Weeks,2018-08-14 A groundbreaking attempt to theorise the feminist subject One of the most important tasks for contemporary feminist theory is to develop a concept of the subject able to meet the challenges facing feminist politics Although theorists in the 1980s raised the problem of feminist subjectivity Kathi Weeks contends that the limited nature of that discussion now blocks the further development of feminist theory While the problems of an already constituted essentialist subject have become patent what remains as an ongoing project Weeks contends is a theory of the constitution of subjects capable of explaining the processes of social construction This book presents one such account Drawing on a number of different theoretical frameworks including feminist standpoint theory socialist feminism and poststructuralist thought as well as theories of performativity and self valorization the author proposes a nonessential feminist subject a theory of constituting subjects

Critiquing Capitalism Today Frederick Harry Pitts,2017-10-17 This book critically introduces two compelling contemporary schools of Marxian thought the New Reading of Marx of Michael Heinrich

and Werner Bonefeld and the postoperaismo of Antonio Negri Each stake novel claims on Marx's value theory the first revisiting key categories of the critique of political economy through Frankfurt School critical theory the second calling the law of value into crisis with reference to Marx's rediscovered Fragment on Machines Today postcapitalist conceptualisations of a changing workplace excite interest in postoperaist projections of a crisis of measurability sparked by so called immaterial labour Using the New Reading of Marx to question this prospectus Critiquing Capitalism Today clarifies complex debates for newcomers to these cutting edge currents of critical thought looking anew at value money labour class and crisis

Cyber-Marx Nick Dyer-Witheford, 1999 In this highly readable and thought provoking work Nick Dyer Witheford assesses the relevance of Marxism in our time and demonstrates how the information age far from transcending the historic conflict between capital and its laboring subjects constitutes the latest battleground in their encounter Dyer Witheford maps the dynamics of modern capitalism showing how capital depends for its operations not just on exploitation in the immediate workplace but on the continuous integration of a whole series of social sites and activities from public health and maternity to natural resource allocation and the geographical reorganization of labor power He also shows how these sites and activities may become focal points of subversion and insurgency as new means of communication vital for the smooth flow of capital also permit otherwise isolated and dispersed points of resistance to connect and combine with one another Cutting through the smokescreen of high tech propaganda Dyer Witheford predicts the advent of a reinvented autonomist Marxism that will rediscover the possibility of a collective communist transformation of society Refuting the utopian promises of the information revolution he discloses the real potentialities for a new social order in the form of a twenty first century communism based on the common sharing of wealth

A Marxist Theory of Ideology Andrea Sau, 2020-06-10 This work explores the question of defining ideology from a Marxist perspective Advancing beyond the schemas of discussion presented in current Marxist literature the author offers an account of how the concept of ideology should be defined and what role it plays within historical materialism Through a close reading of Karl Marx's relevant writings this volume demonstrates that while there is no coherent single account of ideology in Marx's work his materialist framework can be reconstructed in a defensible and non deterministic way The definition of ideology presented is then articulated through a close reading of Antonio Gramsci's Prison Notebooks Efforts are also made to demonstrate that Gramsci's interpretation of historical materialism is indeed consistent and compatible with Marx's A systematic articulation of a theory of ideology that combines the works of Marx and Gramsci as well as adding elements of Pierre Bourdieu's social theory and William James's psychology this volume will appeal to scholars of social and political theory with interests in political economy and Marxist thought

Reading Negri Pierre Lamarche, David Sherman, Max Rosenkrantz, 2011-03-11 Antonio Negri is the most important Marxist theorist working today His writings include novel readings of classical philosophers such as Machiavelli Descartes and Spinoza revolutionary reinterpretations of the central texts of Marx and works of contemporary political analysis Negri is

known in the English speaking world primarily through *Empire* a work he co authored with Michael Hardt in 2000 that became a surprise academic best seller His other writings which have great depth and breadth are equally deserving of attention While most critical accounts of Negri focus only on *Empire* this collection of essays presents readers with a fuller picture of Negri's thought one that does justice to his ability to use the great texts of the philosophical tradition to illuminate the present The collection contains essays from scholars representing a broad spectrum of disciplines and interests and it offers both criticism of and positive commentary on Negri's work

Marx's Not-Capital Benjamin Tetler, 2024-05-23 As a contribution to critical social theory this book reconsiders Marx's critique of political economy through the concept of labour as not capital Engaging with thinkers who have dealt with Marx's concepts of not capital and not value Tetler examines whether and how these concepts can contribute significantly towards a renewal of the critique of political economy beyond the limits of traditional Marxism In doing so he provides the first in depth interrogation of these concepts both within Marx's work itself and within and across the various intellectuals who have put them to use in their attempts to address the faults of traditional Marxism He argues that the theory of value that sits at the heart of Marx's critique of political economy requires a negative conception of labour In helping establish this the notions of labour as not capital value are shown to have formidable ramifications concerning the crisis ridden nature of capitalist social relations and the struggles operative within and against them

Karl Marx, Historian of Social Times and Spaces George García-Quesada, 2021-10-25 Through a discussion with current perspectives in philosophy of history especially with a critical approach to Paul Ricœur's work and a rigorous reading of Karl Marx's oeuvre *Karl Marx Historian of Social Times and Spaces* proposes an interpretation of Marx's concept and method of historical knowledge In this sense the examination of Marx's concepts of social space and social time serve to highlight the possibilities of his work in terms of the explanation of the dynamics of complex multilinear development of human societies and of capitalism in particular

The Oxford Handbook of Karl Marx Matt Vidal, Tony Smith, Tomás Rotta, Paul Prew, 2019-03-26 Karl Marx is one of the most influential writers in history Despite repeated obituaries proclaiming the death of Marxism in the 21st century Marx's ideas and theories continue to guide vibrant research traditions in sociology economics political science philosophy history anthropology management economic geography ecology literary criticism and media studies Due to the exceptionally wide influence and reach of Marxist theory including over 150 years of historical debates and traditions within Marxism finding a point of entry can be daunting *The Oxford Handbook of Karl Marx* provides an entry point for those new to Marxism At the same time its chapters written by leading Marxist scholars advance Marxist theory and research Its coverage is more comprehensive than previous volumes on Marx in terms of both foundational concepts and state of the art empirical research on contemporary social problems It also provides equal space to sociologists economists and political scientists with substantial contributions from philosophers historians and geographers *The Oxford Handbook of Karl Marx* consists of six sections The first section Foundations includes chapters that

Television at Large in South Asia Aswin Punathambekar, Shanti Kumar, 2015-09-25. This book explores the empirical and theoretical significance of understanding television as a dynamic technology, a creative industry and a vibrant cultural form that is at large in South Asia. Bringing together prominent scholars who have shaped television studies in South Asia as well as emerging scholars who address new topics, this book decisively positions television as a key site in the study of South Asian History and Culture. In doing so, it also positions the study of television in South Asia and the South Asian diaspora as crucial in the rethinking of global television history and opens up new directions for the future of television studies. This volume will be essential reading for scholars and teachers of media and communication studies, media history, anthropology and sociology, besides being of great interest to policymakers and media professionals. This book was originally published as a special issue of *South Asian History and Culture*.

Rereading Marx in the Age of Digital Capitalism Christian Fuchs, 2019-10-20. The end of history has not taken place. Ideological and economic crisis and the status quo of neoliberal capitalism since 2008 demand a renewed engagement with Marx. But if we are to effectively resist capitalism, we must truly understand Marx. Marxism today must theorise how communication technologies, media representation and digitalisation have come to define contemporary capitalism. There is an urgent need for critical, Marx-inspired knowledge as a foundation for changing the world and the way we communicate from digital capitalism towards communicative socialism and digital communism. *Rereading Marx in the Age of Digital Capitalism* does exactly this. Delving into Marx's most influential works such as *Capital*, *The Grundrisse*, *Economic and Philosophic Manuscripts*, *The German Ideology* and *The Communist Manifesto*, Christian Fuchs draws out Marx's concepts of machinery, technology, communication and ideology, all of which anticipate major themes of the digital age. A concise and coherent work of Marxist media and communication theory, the book ultimately demonstrates the relevance of Marx to an age of digital and communicative capitalism.

The Progress of This Storm Andreas Malm, 2020-02-04. An attack on the idea that nature and society are impossible to distinguish from each other. In a world careening towards climate chaos, nature is dead. It can no longer be separated from society. Everything is a blur of hybrids where humans possess no exceptional agency to set them apart from dead matter. But is it really so? In this blistering polemic and theoretical manifesto, Andreas Malm develops a counterargument: in a warming world, nature comes roaring back and it is more important than ever to distinguish between the natural and the social. Only with a unique agency attributed to humans can resistance become conceivable.
