A Social Theory of the Nation-State Daniel Chernilo, 2008-03-25 A Social Theory of the Nation State the political forms of modernity beyond methodological nationalism construes a novel and original social theory of the nation state It rejects nationalistic ways of thinking that take the nation state for granted as much as globalist orthodoxy that speaks of its current and definitive decline Its main aim is therefore to provide a renovated account of the nation state's historical development and recent global challenges via an analysis of the writings of key social theorists This reconstruction of the history of the nation state into three periods classical K Marx M Weber E Durkheim modernist T Parsons R Aron R Bendix B Moore contemporary M Mann E Hobsbawm U Beck M Castells N Luhmann J Habermas For each phase it introduces social theory's key views about the nation state its past present and future In so doing this book rejects methodological nationalism the claim that the nation state is the necessary representation of the modern society because it misrepresents the nation state's own problematic trajectory in modernity And methodological nationalism is also rejected because it is unable to capture the richness of social theory's intellectual canon Instead via a strong conception of society and a subtler notion of the nation state A Social Theory of the Nation State tries to account for the opacity of the nation state in modernity

Class, States and International Relations Adrian Budd, 2013-06-19 This book provides an outline and a critique of neo Gramscian international relations theory from a Marxist perspective Focusing on the pioneering work of Robert Cox but also drawing on the wider neo Gramscian literature this book presents a comprehensive account of neo Gramscian international relations theory It highlights the neo Gramscian critique of mainstream Realist theory and the theoretical innovations that resulted from the mobilisation of Gramsci's ideas and Cox's emphasis on the social forces underpinning forms of state and world orders The author explains how this is especially relevant in the current period of war and crisis when the international dimensions of social existence continue to exercise a major influence over domestic politics and economics and when the interest in

Marxism can be expected to grow The book continues to provide a critique of the neo Gramscians and of what the author argues is their one sided reading of Gramsci Placing coercion at the centre of a mode of production analysis of world order the author elaborates a Marxist alternative to neo Gramscianism that provides more robust explanations of world order dynamics and change Using a combination of IR theory and historical explanation including of contemporary world order dynamics and US power this book will appeal to both students and scholars of International Relations international studies and international history **Social Work's Histories of Complicity and Resistance** Vasilios Ioakimidis, Aaron

Modernity and the Pandemic Sean Creaven, 2023-12-01 Modernity and the Pandemic Decivilization Imperialism and COVID 19 applies the tools of critical social theory to make sense of the COVID 19 crisis and presents a critical sociological analysis of aspects of the political and community response to the pandemic The book focuses on key themes integral to a sociology of pandemics in the global age Firstly Creaven argues that cultures of individualism and consumerism and of pervasive and deeply entrenched social inequalities that is decivilization significantly weaken the cause of public health by weakening the compliance of people with state mandated non pharmaceutical interventions including and especially physical distancing rules and encouraging vaccine hesitancy Secondly Creaven examines how interstate competition and imperial politics have undermined an effective global policy response to the COVID 19 pandemic Policy failure with regard to the management of the pandemic is interpreted as being rooted in the dominance of neoliberal ideology and governance in the politics of international relations particularly in the politics of the leading state actors by protecting corporate interests at the expense of public health and in the constraints imposed on state actors by the competitive dynamic of multinational capitalism in the global age Modernity and the Pandemic will appeal to scholars in the humanities and social sciences with interests in neoliberalism and its social cultural and epidemiological impacts *Dictionary of Critical Realism* Mervyn Hartwig, 2015-01-30 Dictionary of Critical Realism fulfils a vital gap in the literature Critical Realism is often criticised for being too opaque and deploying too much jargon thereby making the concepts inaccessible for a wider audience However as Hartwig puts it Just as the tools of the various skilled trades need to be precision engineered for specific interrelated functions so meta theory requires concepts honed for specific interrelated tasks it is impossible to think creatively at that level without them This Dictionary seeks to redress this problem to throw open the important contribution of Critical Realism to a wider audience for the first time by thoroughly explaining all the key concepts and key developments It includes 500 entries on these themes and has contributions from major players in field However this text does not stop there it goes further than simply elucidating the concepts and includes a number of essays which use the notions in important areas thereby demonstrating the appropriate use of the concepts in action to encourage their wider use This book will become a

requisite reference tool for Critical Realist scholars and Philosophers and Social scientists alike will enjoy this vital introduction and explanatory text of the indispensable ideas contained within the dynamic and vibrant school of Critical Realism

Economics and Power Giulio Palermo, 2016-06-03 In the economic debate power is defined and studied mainly as an interpersonal relation occurring out of perfect competition This is a consequence of the combination of methodological individualism and the assumption of competition as a natural and everlasting coordinating mechanism operating without any sort of coercion This methodology however is not adequate to analyze the forms of social coercion that characterize capitalism Economics and Power criticizes the main theories of power developed in economic literature analyzing ultraliberal contractualism to radical political economics and ultimately suggesting a Marxist conception of power and coercion in capitalism Palermo s ontological argument is rooted in the philosophy of critical realism This unique volume presents his main finding as being that the essential coercive mechanism of capitalism is competition Capitalist power is not caused by a lack of competition but by the central role it plays in this mode of production Following this the chapters reconstruct a Marxian conception of power where it is analyzed as a social relation and argues that perfect competition does in fact exist under the disguise of capitalist power This book criticizes the construct of power and the underlying ideas surrounding perfect competition This book is of interest to those who study political economy as well as economic theory and philosophy

A Marxist Critique of Latin American Colonial Studies Malcolm K. Read, 2019-01-21 During the mid 1980s Latin American colonial studies came to be dominated by the various post movements post structuralism post modernism post Marxism characterized by their promotion of discursivity as the ultimate horizon of sociality This volume confronts discourse theory and examples of its colonial application with an alternative Althusserian problematic that foregrounds modes of production and class struggle to which end it further promotes a view of colonial societies as split not along a horizontal geographic axis that offsets the New World against Europe but vertically through the opposition between dominant tributary feudal formations and their emergent capitalist equivalent Its fundamental claim is that the radical sounding rhetoric of the various post movements far from energizing the politics of resistance to the forces of imperialism actually greases the mechanisms of finance capital

Educating the Educators Malcolm Kevin Read, 2003 At the ideological level these shifts correspond to the transformation of the traditional intellectual into a state functionary and ultimately into a technician or expert totally subsumed under capital and charged with the management of cultural studies Running alongside and locked into this first narrative is a second which in the form of three autobiographical essays traces the author's long trek from his childhood origins in a working class family through the institutions of education and the experience of increasing embourgeoisement to his attempts within the Australasian Caribbean and North American academy to retrieve the legacy of socialism
