Kidney Failure Eat Right To Feel Right On Hemodialysis:

Kidney Failure U. S. Department of Health and Human Services, National Institutes of Health, National Institute of Kidney Diseases, 2012-07-23 Food gives you energy and helps your body repair itself Food is broken down in your stomach and intestines Your blood picks up nutrients from the digested food and carries them to all your body cells These cells take nutrients from your blood and put waste products back into the bloodstream When your kidneys were healthy they worked around the clock to remove wastes from your blood The wastes left your body when you urinated Other wastes are removed in bowel movements Now that your kidneys have stopped working hemodialysis removes wastes from your blood But between dialysis sessions wastes can build up in your blood and make you sick You can reduce the amount of wastes by watching what you eat and drink A good meal plan can improve your dialysis and your health Your clinic has a dietitian to help you plan meals A dietitian specializes in food and nutrition A dietitian with special training in care for kidney health is called a renal dietitian When you start hemodialysis you must make many changes in your life Watching the foods you eat will make you healthier This publication by the National Institutes of Health Publication No 08 4274 will help you choose the right foods Use this with a dietitian to help you learn how to eat right to feel right on hemodialysis *Kidney Failure Eat Right to Feel Right on Hemodialysis* U.S. Department of Health and Services, 2014-01-21 When you start hemodialysis you must make many changes in your life Watching the foods you eat will make you healthier This publication will help you choose the right foods Print this publication and use it with a dietitian to help you learn how to eat right to feel right on hemodialysis Read one section at a time Then go through the exercise for that section with your dietitian **The Medical Library Association Guide to Finding Out about Diabetes** Dana L. Transplanting Care Laura L. Heinemann, 2016-07-12 The sudden call the race to the hospital the high stakes operation the drama of transplant surgery is well known But what happens before and after the surgery In *Transplanting Care* Laura L. Heinemann examines the daily lives of midwestern organ transplant patients and those who care for them from pretransplant preparations through to the long posttransplant recovery Heinemann points out that as efforts to control healthcare costs gain urgency and as new surgical techniques drug therapies and home medical equipment advance most of the transplant process now takes place at home among kin Indeed the transplant system effectively depends on unpaid care labor typically provided by spouses parents siblings and others Drawing on scores of interviews with patients relatives and healthcare professionals Heinemann follows a variety of patients and loved ones as they undertake this uncertain and strenuous transplant journey She also shows how these home based caregiving efforts take place within the larger economic and political context of a paucity of resources for patients and caregivers who ultimately must surmount numerous obstacles The author concludes that the many snags encountered by transplant patients and loved ones make a clear case for more comprehensive health and social policy that treats care as a necessarily shared public responsibility An illuminating look at the long transplant journey *Transplanting Care* also offers broader insight into how we handle infirmity in America and how we might do a better job of doing so
