The Case of the Animals versus Man Before the King of the Jinn Lenn E. Goodman, Richard McGregor, 2012-01-26 This is a new English translation of a classic of medieval Islamic learning which illuminates the intellectual debates of its age and speaks vividly to the concerns of our own It is the most famous work of the Brethren of Purity a tenth century esoteric fraternity based in Basra and Baghdad In this rich allegorical fable the exploited and oppressed animals pursue a case against humanity They are granted the gift of speech and presented as subjects with views and interests of their own Over the course of the hearing they rebuke and criticise human weakness deny man's superiority and make powerful demands for greater justice and respect for animals This sophisticated moral allegory combines elements of satire with a thought provoking thesis on animal welfare Goodman and McGregor accompany their translation with an introduction and annotations that explore the rich historical and cultural context to the work **Hunting the Wren** Elizabeth Atwood Lawrence, 1997 A unique interdisciplinary study this book examines the British and European tradition of the wren hunt in which a bird ordinarily revered and protected for most of the year was killed around the time of the annual solstice In focusing on this ancient ritual Elizabeth Atwood Lawrence draws on her training in cultural anthropology and biology to cast a fresh light on the complexities of human animal relationships Following an introductory chapter on animal symbolism Lawrence proceeds in subsequent chapters to describe the wren both as a biological entity and as the subject of numerous tales and legends to delineate the details of the wren hunt ceremony and the various meanings ascribed to it and finally to relate the ceremony to important contemporary issues in human animal interactions and current attitudes toward the living environment Whereas most other studies tend to concentrate solely on human perceptions of animals and fail to include the animal's role in the relationship Lawrence's approach shows how the participation of both animal and human determines the symbolic status of the animal which in turn influences the treatment of that animal within a particular society At a time when human destructiveness toward nature has reached tragic proportions Lawrence contends it is critical that we understand the

processes by which certain cultural beliefs in combination with observations about the natural history of a particular animal result in emotional and mental responses that may ultimately determine the fate of that species The author argues persuasively that the wren hunt with its ancient roots associated beliefs and complex meanings in the preindustrialized world still has much to teach us
