How Change Happens Duncan Green, 2024-05-29 Human society is full of would be change agents a restless mix of campaigners lobbyists and officials both individuals and organizations set on transforming the world They want to

improve public services reform laws and regulations guarantee human rights get a fairer deal for those on the sharp end and achieve greater recognition for any number of issues or simply be treated with respect It is striking then that universities have no Department of Change Studies to which social activists can turn for advice and inspiration Instead scholarly discussions of change are fragmented with few conversations crossing disciplinary boundaries or making it onto the radars of those actively seeking change How Change Happens bridges the gap between academia and practice bringing together the best research from a range of academic disciplines and the evolving practical understanding of activists to explore the topic of social and political change Drawing on many first hand examples from the global experience of Oxfam one of the world s largest social justice NGOs as well as the author s 40 years of studying and working on international development it tests ideas and sets out the latest thinking on what works to achieve progressive change This second edition adds a chapter by the LSE s Dr Tom Kirk on the rising importance of digital technology in activism and analyses the implications of some of the darker currents of populism and shrinking civic space for those trying to bring about positive change This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations
