

Double Door Assembly Instructions

Step 1.

Place both sections on a flat surface (the floor will work) next to each other with the hinges to the floor & away from the middle. Be sure to engage the striker for the door handle when overlapping the two sections. Place the 8" splice bars under the corners and middle of the panels to prop it above the ground a few inches (shown to the right).

Step 2.

Attach your threshold to the bottom of each Panel with the provided Channel Knobs. Connect the 24" support bar to the two sections as shown in picture. Once this is complete, place your sliding top on with the 1 5/8" T-nut & knob. (refer to extension panel instructions)

Step 3.

Now that the double door is fully assembled it may be stood up and moved to where it shall be installed (this may take 2-3 people). Connect cam locks to any existing panels if necessary. The sliding adjustable top can then be slid up to the ceiling and secured by the grid clips provided. Install door handles and closers after the Double door is safely secured to existing panels and ceiling (see below for finished door).

Bottom barrel lock
secures the smaller door
section when unused.
