

However, if there is going to be two folds in the sheet the aluminum deflector should be facing out. To engage, simply position the table so that the two tie rods in between the side frames of the machine will be in the cut-out grooves on the bottom of the fold table (see photo #2 on previous page). It is important that this is done because if the table is not properly positioned, the machine will produce jams and inaccurate folds.

When installing the second fold table for a tri-fold, it should be put in so that the rulers look upside down to the installer.

When setting the folds for the unit, be careful not to over tighten the adjustment knobs on the paper stops.

When installing the second fold table for a half fold, it should be put in so that the rulers look right side up to the installer.

HANDWHEEL INSTALLATION

To install the handwheel on the machine, you will need the Allen wrench that was provided with the unit. Refer to page one of the instructions if necessary.

Install the hand wheel with the set screw tightened to the flat area.
