Ubiquitous Intelligence and Computing Hai Jin, Laurence T. Yang, Jeffrey J.-P. Tsai, 2006-08-24 This book is the refereed proceedings of the Third International Conference on Ubiquitous Intelligence and Computing UIC 2006 held in Wuhan China The book presents 117 revised full papers together with a keynote paper were carefully reviewed and selected from 382 submissions The papers are organized in topical sections on smart objects and embedded systems smart spaces environments and platforms ad hoc and intelligent networks sensor networks and more

Ubiquitous and Pervasive Commerce George Roussos, 2006-02-20 At the core of this book is the interplay between technological and business innovation and social practice Although the benefits of 50 years of rapid advances in digital telecommunications and computing technology have not benefited everyone equally they have nevertheless transformed almost every aspect of the way we live One area where technology has had a clear impact is in the way we conduct business The rate of change that brings about modernity has been considerably strengthened by technological advances applied to product manufacturing distribution financing and management which arguably form the substrate for globalization and consumerism It is thus no surprise that businesses closely monitor advances in technology and invest considerable resources in exploring possible new applications and market opportunities Yet consumers acceptance of new ways of buying and selling depends as much on business and technology as on our society's culture and the culture of the material environment that defines our values sensibilities and thus our commitments Moreover the rate of technological innovation is such that to the consumer technology implementation is fully opaque Nonetheless opportunities to carry out commerce in novel ways also introduce risk to established social structures conventions and institutions In modernity risk management is one of the core functions of society and to be successful in this societies depend on their trust of experts Experts take risks on behalf of society and are responsible for evaluating the full extent of a particular set of hazards including those associated with a particular technology

Frequency Identification Solutions Cristina Turcu, 2010-02-01 Radio frequency identification RFID is a fascinating fast developing and multidisciplinary domain with emerging technologies and applications It is characterized by a variety of research topics analytical methods models protocols design principles and processing software With a relatively large range of applications RFID enjoys extensive investor confidence and is poised for growth A number of RFID applications proposed or already used in technical and scientific fields are described in this book Sustainable Radio Frequency Identification Solutions comprises 19 chapters written by RFID experts from all over the world In investigating RFID solutions experts reveal some of the real life issues and challenges in implementing RFID *Real Estate Record and Builders' Guide* ,1899

Global RFID Edmund W. Schuster, Stuart J. Allen, David L. Brock, 2007-01-25 At the same time I was a junior Brand Manager at Procter Gamble worried about a much more mundane problem how to keep my products on the shelf Embedding RFID tags in the products and RFID readers in the shelf seemed like the perfect indeed the only way to do this But I needed RFID to be cheaper better and standardized in an open system In early 1999 by sheer chance I met Brock and Sarma The result was a potent meeting of minds I was looking to fund research and Brock Sarma and Siu were looking for research funding Working with Alan Haberman of the Uniform Code Council one of the founding fathers of the UPC bar code and Allan Boath of the Gillette Company we developed a plan for a new industry funded research consortium at MIT Haberman wanted to call it the Center For Automatic Identification And Data Capture At the last minute I persuaded him to abbreviate it to the Auto ID Center But my luck with names is hit and miss inspired by the bar code I had the bad idea of calling Auto ID Center's technology UPC2 Brock and Sarma saved the day one of them I cannot remember which proposed a far better alternative EPC for electronic product code The Auto ID Center opened on October 1 1999 PG loaned me to MIT to act as Executive Director and Sunny Siu was the first Research Director **Advanced Laser Technologies 2005** Ivan A.
