Marx After Marx History And Time In The Expansion Of Capitalism

Colleen Lye, Christopher Nealon

Marx After Marx History And Time In The Expansion Of Capitalism:

Marx After Marx Harry Harootunian, 2015-10-27 In *Marx After Marx* Harry Harootunian questions the claims of Western Marxism and its presumption of the final completion of capitalism. If this shift in Marxism reflected the recognition that the expected revolutions were not forthcoming in the years before World War II, its Cold War afterlife helped to both unify the West in its struggle with the Soviet Union and bolster the belief that capitalism remained dominant in the contest over progress. This book deprovincializes Marx and the West's cultural turn by returning to the theorist's earlier explanations of capital's origins and development, which followed a trajectory beyond Euro America to Asia, Africa, and Latin America. Marx's expansive view shows how local circumstances, time, and culture intervened to reshape capital's system of production in these regions. His outline of a diversified global capitalism was much more robust than was his sketch of the English experience in Capital, and helps explain the disparate routes that evolved during the twentieth century. Engaging with the texts of Lenin, Luxemburg, Gramsci, and other pivotal theorists, Harootunian strips contemporary Marxism of its cultural preoccupation by reasserting the deep relevance of history.

After Marx Colleen Lye, Christopher Nealon, 2022-03-17 *After Marx: Literature, Theory, and Value* demonstrates the importance of Marxist literary and cultural criticism for an era of intersectional politics and economic decline. The volume includes fresh approaches to reading poetry, fiction, film, and drama from Shakespeare to contemporary literature, and shows how Marxist literary criticism improves our understanding of racial capitalism, feminist politics, colonialism, deindustrialization, high-tech labor, ecological crisis, and other issues. A key innovation of the volume's essays is how they attend to Marx's theory of value. For Marx, capitalist value demands a range of different kinds of labor, as well as unemployment. This book shows the importance of Marxist approaches to literature that reach beyond simply demonstrating the revolutionary potential or the political consciousness of a 19th-century style industrial working class. *After Marx* makes an argument for the twenty-first century interconnectedness of widely different literary genres and far-flung political struggles.

Marx after the Kyoto School Bradley Kaye, 2022-02-03 Nishida Kitaro (1870-1945) is considered Japan's greatest modern philosopher. As the founder of the Kyoto School, he initiated a rigorous philosophical engagement with Western philosophy, including the work of Karl Marx. Bradley Kaye explores the political aspects of Nishida's thought, placing his work in connection with Marxism and Zen. Developing concepts of self-awareness, Basho dialectical materialism, circulation, will, nothingness, and the state, Nishida's thought offers an ethics of personal will that radical awakening that offers clarity in a seemingly hopeless world.

The Routledge Companion to Marxisms in Art History Tijen Tunali, Brian Winkenweder, 2025-03-31 This companion is an essential contribution to the study of historical materialism in general and the social history of art in particular. Increasingly, scholars adopt an array of Marxist methods intertwined with a host of other theoretical practices, particularly the historiography of key issues regarding hegemony, ideology, and identity. Ideological issues of connoisseurship, patronage,

and analyses of the artwork as a form of labor and leisure are essential to the practice of Marxisms in art history This collection spotlights a plurality of Marxian theories in which the ideas of such figures as Walter Benjamin Guy Debord and T J Clark are debated and developed through analyses of the socio historical conditions that impact how art is produced circulated and received This ultimately underscores that the historical contextualization of artworks and their markets within a class based society is crucial for writing socially engaged art history This book will be of interest to scholars working in art history visual studies visual sociology communication studies and the sociology of art

The Fabric of Historical Time Zoltán Boldizsár Simon, Marek Tamm, 2023-09-07 Historical time is a notoriously elusive notion Yet as societies attempt to make sense of rapidly changing worlds it gains a new significance in the twenty first century This Element sketches a theory of historical time as based on a distinction between temporality and historicity It approaches the fabric of historical time as varying relational arrangements and interactions of multiple temporalities and historicities In the fabric kinds of temporalities and historicities emerge come to being fade out transform cease to exist merge coexist overlap arrange and rearrange in constellations and clash and conflict in a dynamic without a predetermined plot The Element pays special attention to the more than human temporalities of the Anthropocene the technology fueled historicities of runaway changes and the conflicts in the fabric of historical time at the intersections of technological ecological and social change

Capital's Grave Jodi Dean, 2025-03-18 The fact that communism did not prevail does not mean we are still in capitalism Capitalist relations are undergoing systemic transformation and becoming something that might even be worse Bringing together analyses from different fields law technology Marxism and psychoanalysis Jodi

Dean shows the direction the contemporary world is heading neofeudalism Feudalism isn't just a metaphor It's the operating system for the present Politics and plunder thrive in the capitalist pursuit of profit and the many are bound to serve the few coerced into a system of rents destruction and hoarding driven by privilege and dependence The question is In a society of serfs and servants how do we get free With the rise of neofeudalism and as more and more workers are drawn into the service sector from nurses to Uber and delivery drivers Dean argues that we can see the emergence of a new vanguard the class that can lead the struggle for liberation from oppression and exploitation what she calls the servant vanguard

The Specter of Materialism Petrus Liu, 2022-12-09 In recent years queer theory appears to have made a materialist turn away from questions of representation and performativity to those of dispossession precarity and the differential distribution of life chances Despite this shift queer theory finds itself constantly reabsorbed into the liberal project of diversity management This theoretical and political weakness Petrus Liu argues stems from an incomplete understanding of capitalism's contemporary transformations of which China has been at the center In *The Specter of Materialism* Liu challenges key premises of classic queer theory and Marxism turning to an analysis of the Beijing Consensus global capitalism's latest mutation to develop a new theory of the political economy of sexuality Liu explores how relations of gender and sexuality get reconfigured to meet the needs of capital in new regimes of accumulation and dispossession demonstrating that evolving US Asian economic relations shape the emergence of new queer identities and academic theories In so doing he offers a new history of collective struggles that provides a transnational framework for understanding the nexus between queerness and material life

The Sympathetic Consumer Tad Skotnicki, 2021-05-11

When people encounter consumer goods sugar clothes phones they find little to no information about their origins The goods will thus remain anonymous and the labor that went into making them the supply chain through which they traveled will remain obscured In this book Tad Skotnicki argues that this encounter is an endemic feature of capitalist societies and one with which consumers have struggled for centuries in the form of activist movements constructed around what he calls The Sympathetic Consumer This book documents the uncanny similarities shared by such movements over the course of three centuries the transatlantic abolitionist movement US and English consumer movements around the turn of the twentieth century and contemporary Fair Trade activism Offering a comparative historical study of consumer activism the book shows in vivid detail how activists wrestled with the broader implications of commodity exchange These activists arrived at a common understanding of the relationship between consumers producers and commodities and concluded that consumers were responsible for sympathizing with invisible laborers Ultimately Skotnicki provides a framework to identify a capitalist culture by examining how people interpret everyday phenomena essential to it

Insurgent Universality Massimiliano Tomba, 2019-05-16 Scholars commonly take the Declaration of the Rights of Man and Citizen of 1789 written during the French Revolution as the starting point for the modern conception of human rights According to the Declaration the rights of man are held to be universal at all times and all places But as recent crises around migrants and refugees have made obvious this idea sacred as it might be among human rights advocates is exhausted It s long past time to reconsider the principles on which Western economic and political norms rest This book advocates for a tradition of political universality as an alternative to the juridical universalism of the Declaration Insurgent universality isn t based on the idea that we all share some common humanity but rather on the democratic excess by which people disrupt and reject an existing political and economic order Going beyond the constitutional armor of the representative state it brings into play a plurality of powers to which citizens have access not through the funnel of national citizenship but in daily political practice We can look to recent history to see various experiments in cooperative and insurgent democracy the Indignados in Spain the Arab Spring Occupy the Zapatistas in Mexico and going further back the Paris Commune the 1917 peasant revolts during the Russian Revolution and the Haitian Revolution This book argues that these movements belong to the common legacy of insurgent universality which is characterized by alternative trajectories of modernity that have been repressed hindered and forgotten Massimiliano Tomba examines these events to show what they could have been and what they can still be As such he explores how their common legacy can be reactivated Insurgent Universality analyzes the manifestos and declarations that came out of these experiments considering them as collective works of an alternative canon of political theory that challenges the great names of the Western pantheon of political thought and builds bridges between European and non European political and social

experiments **The Capitalist Unconscious** Hyun Ok Park, 2015-09-01 The unification of North and South Korea is widely considered an unresolved and volatile matter for the global order but this book argues capital has already unified Korea in a transnational form As Hyun Ok Park demonstrates rather than territorial integration and family union the capitalist unconscious drives the current unification imagining the capitalist integration of the Korean peninsula and the Korean diaspora as a new democratic moment Based on extensive archival and ethnographic research in South Korea and China The Capitalist Unconscious shows how the hegemonic democratic politics of the post Cold War era reparation peace and human rights have consigned the rights of migrant laborers protagonists of transnational Korea to identity politics constitutionalism and cosmopolitanism Park reveals the riveting capitalist logic of these politics which underpins legal and policy debates social activism and media spectacle While rethinking the historical trajectory of Cold War industrialism and its subsequent liberal path this book also probes memories of such key events as the North Korean and Chinese revolutions which are integral to migrants reckoning with capitalist allures and communal possibilities Casting capitalist democracy within an innovative framework of historical repetition Park elucidates the form and content of the capitalist unconscious at different historical moments and dissolves the modern opposition among socialism democracy and dictatorship The Capitalist Unconscious astutely explores the neoliberal present's past and introduces a compelling approach to the question of history and contemporaneity

History without Chronology Stefan Tanaka, 2019-01-01 Although numerous disciplines recognize multiple ways of conceptualizing time Stefan Tanaka argues that scholars still overwhelmingly operate on chronological and linear Newtonian or classical time that emerged during the Enlightenment This short approachable book implores the humanities and humanistic social sciences to actively embrace the richness of different times that are evident in non modern societies and have become common in several scientific fields throughout the twentieth century Tanaka first offers a history of chronology by showing how the social structures built on clocks and calendars gained material expression Tanaka then proposes that we can move away from this chronology by considering how contemporary scientific understandings of time might be adapted to reconceive the present and pasts This opens up a conversation that allows for the possibility of other ways to know about and represent pasts A multiplicity of times will help us broaden the historical horizon by embracing the heterogeneity of our lives and world via rethinking the complex interaction between stability repetition and change This history without chronology also allows for incorporating the affordances of digital media

Race, Time, and Utopia William M. Paris, 2024 Racial injustice at its core is the domination of time Utopia has been one response to this domination The racially dominated are not free to define what counts as progress they are not free from the

accumulation of past injustices and most importantly they are not free from the arbitrary organization of work in capitalist labor markets Racially unjust societies are forms of life where the justifications for how to organize time around life labor and leisure are out of the hands of the dominated In *Race Time and Utopia* William Paris provides a theoretical account of utopia as the critical analysis of the sources of time domination and the struggle to create emancipatory forms of life Rather than focusing on inclusion and equality before the law as found in liberal theories of racial injustice Paris analyses the neglected utopian tradition of justice in black political thought that insists justice can only be secured through the transformation of society as a whole This transformation is nothing less than the democratic transformation of how organize and narrate our shared time Bringing into conversation the work W E B Du Bois Martin Delany Marcus Garvey Frantz Fanon and James Boggs with the critical theory of Karl Marx Ernst Bloch Rahel Jaeggi and Rainer Forst Paris reconstructs a social theory and normative account of forms of life as the struggle over how time will be organized asking Can there be freedom without a new order of time

Pan-Asianism and the Legacy of the Chinese Revolution Viren Murthy, 2023-10-25 With Xi Jinping's project to revive the ancient Silk Road for the contemporary era new analyses of pan Asianism have proliferated Most of these narratives focus especially on the rise of China as the natural leader of new capitalist bloc foretelling a shift of power from the West to the East What these approaches lack however is any historical grounding in the thought of influential twentieth century pan Asianists Viren Murthy explores the writings and specific historical contexts of key pan Asianist intellectuals in Japan China and India from the early 1900s to the present to clarify how current discourses distort the very foundations of pan Asianism At the heart of this thinking was the notion of a unity of Asian nations of weak nations becoming powerful and of the Third World

confronting the advanced world on equal terms But there was more pan Asianists envisioned a future beyond both imperialism and capitalism That the resurgence of pan Asianist discourse has emerged alongside the dominance of capitalism Murthy argues signals a profound misunderstanding **Communist Study** Derek R. Ford,2022-01-14 In the second edition of this groundbreaking work Derek R Ford contends that radical politics needs educational theory posing a series of educational questions pertinent to revolutionary movements How can pedagogy bridge the gap between what is and what can be while respecting the gap and its uncertainty and contingency How can pedagogy accommodate ambiguity while remaining faithful to the communist project In answering these questions Ford develops a dynamic pedagogical constellation that radically opens up what education is and what it can mean for revolutionary struggle In charting this constellation Ford takes the reader on a journey that traverses disciplinary boundaries innovatively reading theorists as diverse as Lenin Agamben Marx Lyotard Althusser and Butler Demonstrating how learning underpins capitalism and democracy Ford articulates a theory of communist study as an alternative and oppositional logic that perhaps paradoxically demands the revolutionary reclamation of testing Poetic performative and provocative Communist Study is oriented toward what Ford calls the sublime feeling of being in common which as he insists is always a commonness against
