Essays in Dynamic General Equilibrium Theory Alessandro Ciarra, John Donaldson, H. Polemarchakis, Paolo Siconolfi, Stephen Spear, 2006-01-11 In the area of dynamic economics, David Cass's work has spawned a number of important lines of research, including the study of dynamic general equilibrium theory, the concept of sunspot equilibria, and general equilibrium theory when markets are incomplete. Lecture Notes in Microeconomic Theory Ariel Rubinstein, 2012-03-04 Ariel Rubinstein's well-known lecture notes on microeconomics, now fully revised and expanded. This book presents Ariel Rubinstein's lecture notes for the first part of his well-known graduate course in microeconomics. Developed during the fifteen years that Rubinstein taught the course at Tel Aviv University, Princeton University, and New York University, these notes provide a critical assessment of models of rational economic agents and are an invaluable supplement to any primary textbook in microeconomic theory. In this fully revised and expanded second edition, Rubinstein retains the striking originality and deep simplicity that characterize his famously engaging style of teaching. He presents these lecture notes with a precision that gets to the core of the material and he places special emphasis on the interpretation of key concepts. Rubinstein brings this concise book thoroughly up to date, covering topics like modern choice theory and including dozens of original new problems. Written by one of the world's most respected and provocative economic theorists, this second edition of *Lecture Notes in Microeconomic Theory* is essential reading for students, teachers, and research economists. Fully revised, expanded, and updated. Retains the engaging style and method of Rubinstein's well-known lectures. Covers topics like modern choice theory. The Pre-Kernel as a Tractable Solution for Cooperative Games Holger Ingmar Meinhardt, 2013-10-23 This present book provides an alternative approach to study the pre kernel solution of transferable utility games based on a generalized conjugation theory from convex analysis Although the pre kernel solution possesses an appealing axiomatic foundation that lets one consider this solution concept as a standard of fairness the pre kernel and its related solutions are regarded as obscure and too technically complex to be treated as a real alternative to the Shapley value Comprehensible and efficient computability is widely regarded as a desirable feature to qualify a solution concept apart from its axiomatic foundation as a standard of fairness We review and then improve an approach to compute the pre kernel of a cooperative game by the indirect function The indirect function is known as the Fenchel Moreau conjugation of the characteristic function Extending the approach with the indirect function we are able to characterize the pre kernel of the grand coalition simply by the solution sets of a family of quadratic objective functions *The British National Bibliography* Arthur James Wells, 1998
