Building Modern Antiquity Georgia Giannakopoulou, 2024-11-29 This book considers post 19th century Athens as a unique instance of a secret side of metropolitan capitalism With a focus on modern antiquity as the hidden element of the dialectic between the past and the present it suggests that the sociological study of one of the great European capital cities a city not intended as a modern capital and its architectural representations may expose part of the veiled processes of the reconstruction of the past thus shedding light on the abuse of antiquity for the celebration of European capitalist metropolitan modernity From the glorious white marble cityscape of the 19th century that aimed at re-enchanting metropolitan modernity to the inglorious grey reinforced concrete 21st century metropolis modern Athens exposes the battle between the modern and a modern image of antiquity a false socially constructed historiography born of the dialectics between the ancient and the modern the new and the old collective memory and collective forgetting As such The Building of a Modern Antiquity will appeal to scholars of sociology with interests in social and critical theory urban

studies sociology of architecture and visual sociology Towards a Dialogical History of Modern Architecture Jorge Francisco Liernur, 2024-07-15 The book challenges three perspectives on the modern architectural canon explanations that disregard impacts and effects beyond the North Atlantic monologic superficial modifications that simply add Other figures to the canon and views that reject the canon itself Instead it recognizes the canon s significance in comprehending architecture while seeking to uncover its presumed Western centric integrity through a shift from a monological to a dialogical approach This approach integrates concepts of identity and Otherness as dialectically articulated and mutually interrelated In essence the book s main thesis contends that the canon s historiographic construction overlooked the existence of Otherness specifically neglecting the world beyond the North Atlantic nucleus of the West By examining a global context to comprehend the canon formation the book proposes a more accurate understanding of the history of modern architecture Recognizing that this task cannot emanate from a single hegemonic center it presents the prospect of a coral type architectural history This narrative should and could encompass voices from diverse cultures to explore the particular circumstances of the world intertwined with each piece or figure transiently integrated into that canon As a result the ideal readers of this book position themselves within multiple settings keen on engaging in a critical global conversation about modern architectural discourse It will be of interest to researchers and students of architecture architectural history and cultural studies **Resisting Postmodern Architecture** Stylianos Giamarellos, 2022-01-10 Since its first appearance in 1981 critical regionalism has enjoyed a celebrated worldwide reception The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation Today its main principles such as acknowledging the climate history materials culture and topography of a specific place are integrated in architects education across the globe But at the same time the richer cross cultural history of critical regionalism has been reduced to schematic juxtapositions of the global with the local Retrieving both the globalising branches and the overlooked cross cultural roots of critical regionalism *Resisting Postmodern Architecture* resituates critical regionalism within the wider framework of debates around postmodern architecture the diverse contexts from which it emerged and the cultural media complex that conditioned its reception In so doing it explores the intersection of three areas of growing historical and theoretical interest postmodernism critical regionalism and globalisation Based on more than 50 interviews and previously unpublished archival material from six countries the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice Stylianos Giamarellos challenges long held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory history and historiography Architecture and the Right to Heal Esra Akcan, 2025-10-03 Esra Akcan explores architecture s role in the healing processes that take place following socioeconomic political and

South Africa South America and Central Asia *Immaterial Architecture* Jonathan Hill, 2006-04-18 This fascinating argument from Jonathan Hill presents the case for the significance and importance of the immaterial in architecture. Architecture is generally perceived as the solid physical matter that it unarguably creates but what of the spaces it creates. This issue drives Hill's explorative look at the immaterial aspects of architecture. The book discusses the pressures on architecture and the architectural profession to be respectively solid matter and solid practice and considers concepts that align architecture with the immaterial such as the superiority of ideas over matter, command of drawing and design of spaces and surfaces. Focusing on immaterial architecture as the perceived absence of matter, Hill devises new means to explore the creativity of both the user and the architect, advocating an architecture that fuses the immaterial and the material and considers its consequences, challenging preconceptions about architecture, its practice, purpose, matter and use. This is a useful and innovative read that encourages architects and students to think beyond established theory and practice.
