Green Backlash Global Subversion Of The Environment Movement:

Green Backlash Andrew Rowell,1996 *Green Backlash* blows the lid off the political Right and industry as they fight back examining the threats and challenges and concludes how the environmental movement can re evaluate and change for the better to overcome this

Green Backlash Andrew Rowell,1996 *From Environmental Action to Ecoterrorism?* Gerry Nagtzaam,2017-01-27 This book scrutinizes the growth of the eco terrorism movement operating on a global scale focusing on the main groups and their more radical offshoots both historically and those currently active These include Earth First the Earth Liberation Front the Animal Liberation Front and the Sea Shepherd Conservation Society It critically examines how these groups form and how they have evolved their key personnel their strategies and tactics principles motivating philosophies and attitudes to violence Specifically the book seeks to understand whether such groups inevitably evolve from activists to militants to terrorists as the literature suggests Lastly it considers the future of such groups asking whether they will become more prominent as more people become ecologically aware and as global environmental conditions deteriorate or whether such groups have peaked as a force for environmental change

Citizenship and Migration in the Era of Globalization Markus Pohlmann,Jonghoe Yang,Jong-Hee Lee,2013-03-15 In an age of globalization there is frequent migration across national borders resulting in a reconsideration of the notion practice and social institution of national citizenship Addressing this phenomenon the book focuses on the exchange between and responses of Korea and Germany In particular the book deals extensively with citizenship in Korea where the concept of citizenship is young and thus the study of citizenship is relatively scarce This book may be the first of its kind bringing together eminent Korean and German scholars to analyse various aspects of citizenship in Korea It is hoped that it will contribute to scholarship in the fields of citizenship and migration and to an understanding of the flow of people and ideas between Asia and Europe

Engineering, Development and Philosophy Steen Hyldgaard Christensen,Carl Mitcham,Bocong Li,Yanming An,2012-10-30 This inclusive cross cultural study rethinks the nexus between engineering development and culture It offers diverse commentary from a range of disciplinary perspectives on how the philosophies of today s cultural triumvirate American European and Chinese are shaped and given nuance by the cross fertilization of engineering and development Scholars from the humanities and social sciences as well as engineers themselves reflect on key questions that arise in this relational context such as how international development work affects the professional views identities practice and ethics of engineers The first volume to offer a systematic and collaborative study that cuts across continental boundaries the book delineates the kinds of skills and competences that tomorrow s engineering success stories will require and analyzes fascinating aspects of the interplay between engineering and philosophy such as how traditionally Chinese ways of thinking can influence modern engineering practice in the world s most populous country China s problematic mix of engineering woes and wonders from the high profile crash on its high profile rail network to its bird s nest Olympic stadium adds to the urgency for reform while Europe s

Enlightenment informed legal frameworks are contrasted with Chinese mechanisms in their governance of the field of nanotechnology a crucial element of future technical evolution Fascinating and compelling in equal measure this volume addresses one of the topics at the leading edge of humanity's quest to survive and to thrive **Spaces of Sustainability** Mark Whitehead, 2007-01-24 Spaces of Sustainability is an engaging and accessible introduction to the key philosophical ideas which lie behind the principles of sustainable development This topical resource discusses key contemporary issues including global warming third world poverty transnational citizenship and globalization Combining the latest research and theoretical frameworks Spaces of Sustainability offers a unique insight into contemporary attempts to create a more sustainable society and introduces the debates surrounding sustainable development through a series of interesting transcontinental case studies These include discussions of land use conflicts in the USA agricultural reform in the Indian Punjab environmental planning in the Barents Sea community forest development in Kenya transport policies in Mexico City and political reform in Russia Written in an approachable and concise manner this is essential reading for students of geography planning environmental politics and urban studies It is illustrated throughout with figures and plates along with a range of explanatory help boxes and useful web links *Utopia: Social Theory and the Future* Keith Tester, Michael Hviid Jacobsen, 2016-02-17 In the light of globalization's failure provide the universal panacea expected by some of its more enthusiastic proponents and the current status of neo liberalism in Europe a search has begun for alternative visions of the future alternatives to the free market and to rampant capitalism Indeed although these alternatives may not be conceived of in terms of being a perfect order there does appear to be a trend towards utopian thinking as people including scholars and intellectuals search for inspiration and visions of better futures If as this search continues it transpires that politics has little to offer then what might social theory have to contribute to the imagination of these futures Does social theory matter at all What resources can it offer this project of rethinking the future Without being tied to any single political platform Utopia Social Theory and the Future explores some of these questions offering a timely and sustained attempt to make social theory relevant through explorations of its resources and possibilities for utopian imaginations It is often claimed that utopian thought has no legitimate place whatsoever in sociological thinking yet utopianism has remained part and parcel of social theory for centuries As such in addition to considering the role of social theory in the imagination of alternative futures this volume reflects on how social theory may assist us in understanding and appreciating utopia or utopianism as a special topic of interest a special subject matter a special analytical focus or a special normative dimension of sociological thinking Bringing together the latest work from a leading team of social theorists this volume will be of interest to sociologists social and political theorists anthropologists and philosophers **Companies, International Trade and Human Rights** Janet Dine, 2005-02-24 Originally published in 2005 this book focuses on the role of corporations within the trading system and the complex relationships between corporations nation states and international organisations The actions and motives that drive

corporations are considered as well as the structure of the international trading system Remedial devices such as Codes of Conduct and Human Rights instruments are assessed for effectiveness The book seeks reasons for what is a growing understanding that international trading regimes are not meeting objectives found in many international agreements including both the international trade agreements themselves WTO GATT TRIPS etc and human rights instruments In particular it is clear that the prevalence and severity of poverty is not being adequately addressed This work sets out to investigate the role played by companies in this failure in the globalisation of trade to realise its aims in particular the failure to achieve the minimum of basic rights the right to food

The Emergence of Ecological Modernisation Mr Stephen C Young, 2018-10-24 The Emergence of Ecological Modernisation offers a wealth of empirical research material from an international perspective bringing together previously scattered sources for the first time It addresses a series of theoretical issues that are of key contemporary relevance such as the relationship between ecological modernisation and sustainable development strategies for promoting ecological modernisation and the extent to which it is possible to green contemporary capitalism

Politics of the Environment Chukwumerije Okereke, 2018-12-07 The environment is increasingly seen at the forefront of many political agendas Covering important topics such as the Kyoto protocol and deforestation this book provides extensive coverage of all aspects of environmental politics Essays of around 6 000 words in length make up the bulk of the book Written by notable experts in the field of environmental politics these essays each examine a different aspect of the subject

The Routledge Companion to Social and Political Philosophy Gerald F. Gaus, Fred D'Agostino, 2013 This comprehensive work provides an up to date survey of social and political philosophy charting its history and key figures and movements and addressing enduring questions as well as contemporary research

Environment and Business Alasdair Blair, David Hitchcock, 2004-08-02 This text examines how businesses and the environment interact It is ideal for students with no previous knowledge of business studies It examines in depth the ways in which business industry the physical environment environmentalism and social change have evolved alongside each other The authors use boxed case studies to highlight how business practice and the environment interact at levels from local to global with examples from multinational companies government bodies national charities and local enterprise The book also contains a large number of informative diagrams The case studies include Shell Oil's environmental policy railways and the industrial revolution the British National Trust's business enterprises Sainsbury's approach to organic foods Australia's landcare scheme changing trends in retailing Brent Spar big game hunting and conservation

Ecological Politics and Democratic Theory Mathew Humphrey, 2007-09-12 This volume examines the reasons why some despair at the prospects for an ecological form of democracy and challenges the recent deliberative turn in environmental political thought Deliberative democracy has become popular for those seeking a reconciliation of these two forms of politics Demand for equal access to a public forum in which the best argument will prevail appears to offer a way of incorporating environmental interests into the democratic

process This book argues that deliberative theory far from being friendly to the environmental movement shackles the ability those seeking radical change to make their voices heard in the most effective manner Mathew Humphrey challenges beliefs about the relationship between ecological politics and democracy at a time when those who take direct action are being swept up in the War on Terror By calling for a more open and contested form of democracy in which the boundaries of what constitutes acceptable behaviour are not decided in advance of actual debate Ecological Politics and Democratic Theory is an original contribution to the literature on environmental politics ecological thought and democracy

Oil Injustice Patricia Widener, 2011-09-16 Oil Injustice examines the mobilization efforts of four communities with different oil histories in response to the construction of an oil pipeline Using multiple sites in Ecuador as case studies Patricia Widener examines the efforts of grassroots groups non governmental organizations activist mayors and transnational advocates that mobilized to redefine the country's oil path and to represent the voice of many local communities and organizations that sought to offer an alternative to the nation's oil dependency and to the use of its oil wealth These groups generated divergent and at times rival reactions to the pipeline though at their core the multiple campaigns developed from a shared history and awareness of a number of marginalized communities and degraded environments in areas most important to the oil process Widener shows that global environmental justice demands are bound within a capitalist political system where community activists national NGOs and their international allies are forced to seek local change rather than attempt to defeat a disabling and unequal system

Ideology, Social Theory, and the Environment William D. Sunderlin, 2003 Does human population growth threaten the environment or does it guarantee we will safeguard it Is economic growth the key ecological problem or is it in fact the solution What will be the leading force to save the planet civil society government or private enterprise This book shows that these polemical debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems Sunderlin argues that laying the foundation for a livable world involves giving conscious and dedicated attention to the core tenets of all three political traditions action against class inequality and advocacy of social justice within and among countries reformation of laws and policies emanating from the halls of power and technological innovation in centers of research and wholesale cultural change and promotion of individual initiative responsibility and creativity

Routledge International Handbook of Sustainable Development Michael Redclift, Delyse Springett, 2015-03-02 This Handbook gives a comprehensive international and cutting edge overview of Sustainable Development It integrates the key imperatives of sustainable development namely institutional environmental social and economic and calls for greater participation social cohesion justice and democracy as well as limited throughput of

materials and energy The nature of sustainable development and the book's theorization of the concept underline the need for interdisciplinarity in the discourse as exemplified in each chapter of this volume The Handbook employs a critical framework that problematises the concept of sustainable development and the struggle between discursivity and control that has characterised the debate It provides original contributions from international experts coming from a variety of disciplines and regions including the Global South Comprehensive in scope it covers amongst other areas Sustainable architecture and design Biodiversity Sustainable business Climate change Conservation Sustainable consumption De growth Disaster management Eco system services Education Environmental justice Food and sustainable development Governance Gender Health Indicators for sustainable development Indigenous perspectives Urban transport The Handbook offers researchers and students in the field of sustainable development invaluable insights into a contested concept and the alternative worldviews that it has fostered

Transnational Environmental Crime Rob White, 2017-07-05 The essays selected for this volume illustrate the growing interest in and importance of crime that is both environmental and transnational in nature The topics covered range from pollution and waste to biodiversity and wildlife crimes and from the violation of human rights associated with the exploitation of natural resources through to the criminogenic implications of climate change The collection provides insight into the nature and dynamics of this type of crime and examines in detail who is harmed and what can be done about it Differential victimisation and contemporary developments in environmental law enforcement are also considered Collectively these essays lay the foundations for a criminology that is forward looking global in its purview and that deals with the key environmental issues of the present age

Australian Environmental Policy 2 Ken J. Walker, Kate Crowley, 1999 A textbook of readings that replaces Australian Environmental Policy 1992 edited by Ken Walker

The Terrestrial Biosphere S.T. Trudgill, 2014-09-25 Terrestrial Biosphere tries to pose the questions which underlie the many sided debate of how to respond to and influence change How should we view nature What do we do for the best how should we act what are we trying to achieve and what should we be guided by In doing so the book introduces and attempts to analyse not only scientific aspects of the debate but also cultural attitudes and values the notions of ecosystem stability are now challenged and it is also clear that ecosystems are renewable but not repeatable It finds that prescriptive solutions based on current constructs may not be adequate Feeling that analysis should lead to advocacy the author believes that if we can't improve predictability we have to increase adaptability which means that ecological and social capacity building should be advocated This is seen in terms of concepts institutions attitudes and values which allow for a plurality of meanings and which can cope with surprise and unforeseen change and which also facilitates responses to change

Interdisciplinary Measures Graham Huggan, 2008-01-01 Where now for postcolonial studies That is the central question in this new volume from one of the field's most original thinkers Not so long ago the driving force behind postcolonial criticism was literary increasingly however many have claimed that the future of postcolonial studies is interdisciplinary Interdisciplinary

Measures thoroughly considers this alternative trajectory through the field of postcolonial studies by setting up a series of conversations among these newly postcolonial disciplines notably geography environmental studies history and anthropology and literary studies in which the imaginative possibilities of non Western epistemologies are brought to the fore
