Today we recognize that we have a different relationship to media technology and to information more broadly than we had even five years ago We are connected to the news media to our jobs and to each other 24 hours a day But many people have found their mediated lives to be too fast too digital too disposable and too distracted This group which includes many technologists and young people believes that current practices of digital media production and consumption are unsustainable and works to promote alternate ways of living Until recently sustainable media practices have been mostly overlooked or thought of as a counterculture But as Jennifer Rauch argues in this book the concept of sustainable media has taken hold and continues to gain momentum Slow media is not merely a lifestyle choice she argues but has potentially great implications for our communities and for the natural world In eight chapters Rauch offers a model of sustainable media that is slow green and mindful She examines the principles of the Slow Food movement humanism localism simplicity self reliance and fairness and applies them to the use and production of media Challenging the perception that digital media is necessarily eco friendly she examines green media which offers an alternative to a current commodities system that produces electronic waste and promotes consumption of nonrenewable resources Lastly she draws attention to mindfulness in media practice mindful emailing or contemplative computing for example arguing that media has significant impacts on human health and psychological wellbeing Slow Media will ultimately help readers understand the complex and surprising relationships between everyday media choices human well being and the natural world It has the potential to transform the way we

produce and use media by nurturing a media ecosystem that is more satisfying for people and more sustainable for the planet
