Center, 2017-11-08 Care to take a ride This book takes a tour through my life From the halls of Congress to the Middle East and many points in between these stories are the mile markers of my life The fare is reasonable the scenery interesting and the conversation amusing Hop in **War on the Human** Konstantinos Blatanis, Theodora Tsimpouki, 2017-05-11 The essays in this collection explore the question of the human both as a contested concept and as it relates to and functions within the wider global conjuncture The authors explore the theoretical underpinnings of the term human inviting the reader to reflect upon the contemporary human condition to identify opportunities and threats in the changes ahead and to determine what aspects of our species we should abandon or strive to maintain The volume approaches these ideas from a myriad of perspectives but the authors are united in their abstention from rejecting humanism outright or indeed fully endorsing posthumanism's teleological narrative of accelerated progress and perfectability Instead the authors argue that the term human itself is better understood as a concept perpetually undergoing revision and is necessarily subject to scrutiny The contributors here are thus concerned with investigating the following questions What does it mean to be human or to have a self What is the current place or status of the human in the contemporary world As technology is increasingly used to modify our bodies and minds to what extent should we alter and how can we improve our very understanding of human nature The authors contend that literature is the art form best placed to answer these questions In its dynamism and discursiveness literature has the capacity to both reflect dominant discourses and ideologies as well as to generate and even anticipate social change to critique and refine conventional ideas and existing cultural modes and to envision new possibilities for the future The human and its literary representation in other words are inherently intertwined *The Year's Best Science*

Fiction, 1992 **Identity in Science Fiction** Tom Cochrane, 2025-09-18 In the first science fiction and philosophy anthology to focus on identity a set of exemplary stories raise deep questions about who and what we are Featuring classic authors and brand new work we are confronted with a fundamental metaphysical topic within every story Are we souls brains animals or patterns of information Are the Buddhists right to say that the self is an illusion Do we survive under conditions such as total amnesia or the destruction of the body Each story is accompanied by an introductory overview and narrative explaining the ideas and the principal philosophical arguments behind it Alongside deeper appreciation of stories by authors such as Roald Dahl John Varley J R Dawson and Ursula Le Guin we are seamlessly introduced to the philosophy of personal identity through memorable fiction The Barbie Murders depicts a society in which each member conforms to a strict template for their physical and mental characteristics Marley and Marley follows a middle aged woman who takes part in a government program to travel back in time to take care of her orphaned younger self Edward the Conqueror illustrates the concept of the soul as an essence of a person that persists while other things about them may change Thought provoking and highly entertaining this one of a kind anthology challenges traditional beliefs around how we see ourselves and allows us to understand what it means to be human *Residues of Death* Tamara Kohn, Martin Gibbs, Bjorn Nansen, Luke van Ryn, 2019-05-16 This book provides a critical overview of the changing ways people mourn commemorate and interact with the remains of the dead including bodies materials and digital artefacts It focuses on how residues of death persist and circulate through different spaces materials data and mediated memories refiguring how the disposal of the dead is understood enacted and contested across the globe The volume contains contributions by scholars from a number of disciplines and includes a diverse range of case studies drawn from Asia Europe and North America Together they reveal how rapidly changing practices industries and experiences around death s remains involve the entwining of digital technologies with other material and ritualised forms of commemoration as well as with shifting boundaries between the sacred and the profane the institutional and the vernacular the public and the private **Metaworlds** Paul Collins, 1994 Collection of the most popular short stories written by Australian science fiction authors The stories chosen by computer on the basis of reader polls share themes including birth rebirth and transmutation Story authors include George Turner Damien Broderick Rosaleen Love Terry Dowling Greg Egan Jack Wodhams Stephen Dedman Leanne Frahm David Lake and Dirk Strasser The editor is author of Hot Lead Cold Sweat *Psience Fiction* Damien Broderick, 2018-05-31 Science fiction has often been considered the literature of futuristic technology fantastic warfare among the stars or ruinous apocalypses on Earth The last century however saw through John W Campbell the introduction of psience fiction which explores such themes of mental powers as telepathy precognition of the future teleportation etc and symbolic machines that react to such forces The author surveys this long ignored literary shift through a series of influential novels and short stories published between the 1930s and the present This discussion is framed by the sudden surge of interest in parapsychology and its absorption not

only into the SF genre but also into the real world through military experiments such as the Star Gate Program *Monsters of Film, Fiction, and Fable* Lisa Wenger Bro, Mary Ann Gareis, Crystal O'Leary-Davidson, 2018-07-27 Monsters are a part of every society and ours is no exception They are deeply embedded in our history our mythos and our culture However treating them as simply a facet of children s stories or escapist entertainment belittles their importance When examined closely we see that monsters have always represented the things we fear that which is different which we can t understand which is dangerous which is Other But in many ways monsters also represent our growing awareness of ourselves and our changing place in a continually shrinking world Contemporary portrayals of the monstrous often have less to do with what we fear in others than with what we fear about ourselves what we fear we might be capable of The nineteen essays in this volume explore the place and function of the monstrous in a variety of media stories and novels like Baum s Oz books or Gibson s Neuromancer television series and feature films like The Walking Dead or Edward Scissorhands and myths and legends like Beowulf and The Loch Ness Monster in order to provide a closer understanding of not just who we are and who we have been but also who we believe we can be for better or worse
