Wesley Roehn,1962 **Stalin and the Bomb** David Holloway,2008-10-01 The classic and utterly engrossing study of Stalin s pursuit of a nuclear bomb during the Cold War by the renowned political scientist and historian Foreign Affairs For forty years the U S Russian nuclear arms race dominated world politics yet the Soviet nuclear establishment was shrouded in secrecy Then shortly after the

collapse of the Soviet Union David Holloway pulled back the Iron Curtain with his marvelous groundbreaking study *Stalin and the Bomb* The New Yorker How did the Soviet Union build its atomic and hydrogen bombs What role did espionage play How did the American atomic monopoly affect Stalin's foreign policy What was the relationship between Soviet nuclear scientists and the country's political leaders David Holloway answers these questions by tracing the dramatic story of Soviet nuclear policy from developments in physics in the 1920s to the testing of the hydrogen bomb and the emergence of nuclear deterrence in the mid 1950s This magisterial history throws light on Soviet policy at the height of the Cold War illuminates a central element of the Stalinist system and puts into perspective the tragic legacy of this program environmental damage a vast network of institutes and factories and a huge stockpile of unwanted weapons Buried Glory Istvan Hargittai, 2013-09-19 Moscow's Novodevichy Cemetery is the final resting place of some of Russia's most celebrated figures from Khrushchev and Yeltsin to Anton Chekhov Sergei Eisenstein Nikolai Gogol and Mikhail Bulgakov Using this famed cemetery as symbolic starting point *Buried Glory* profiles a dozen eminent Soviet scientists nine of whom are buried at Novodevichy men who illustrate both the glorious heights of Soviet research as well as the eclipse of science since the collapse of the USSR Drawing on extensive archival research and his own personal memories renowned chemist Istvan Hargittai brings these figures back to life placing their remarkable scientific achievements against the tense political backdrop of the Cold War Among the eminent scientists profiled here are Petr L Kapitza one of the most brilliant representatives of the great generation of Soviet physicists a Nobel Prize winner who risked his career and his life standing up for fellow scientists against Stalin Yulii B Khariton who ran the highly secretive Soviet nuclear weapons laboratory Arzamas 16 despite being Jewish and despite the fact that his father Boris had been sent to the labor camps And Andrei D Sakharov the father of the Soviet hydrogen bomb and a brilliant fighter for human rights for which he won the Nobel Peace Prize Along the way Hargittai shines a light on the harrowing conditions under which these brilliant researchers excelled Indeed in the post war period Stalin's anti-Semitism and ongoing anti-science measures devastated biology damaged chemistry and nearly destroyed physics The latter was saved only because Stalin realized that without physics and physicists there could be no nuclear weapons The extraordinary scientific talent nurtured by the Soviet regime belongs almost entirely to the past *Buried Glory* is both a fitting tribute to these great scientists and a fascinating account of scientific work behind the Iron Curtain *Manufacturing Technology Transfer* Yasuo Yamane, Tom Childs, 2018-10-08 Based on a bestselling book originally published in Japanese *Manufacturing Technology Transfer A Japanese Monozukuri View of Needs and Strategies* offers time tested methods and little known tips for achieving successful transfer of technology along with the skills required to operate that technology Designed to support a series of lectures on technology transfer within a master's course on the management of technology it presents the results of years of research carried out at Hiroshima University The book delves into the authors' decades of experience transferring technology between Japan and the rest of the world particularly to

developing countries from where much of the world's future economic growth is expected. It contains case studies of successful technology transfers from both the ship building and food equipment industries. Its wide reaching coverage examines methods of skill transfer, production management and manufacturing company classification. Introducing readers to the engineering activities that occur within the manufacturing industry, the book illustrates the engineering technology activities involved in manufacturing along with the production management activities required to support them. It also explains how job simulators can help shorten learning times in the manufacturing industry in the same way that flight simulators are used to teach flying skills to pilots. The book outlines a framework for teaching and learning processes that can be visualized in terms of an S shaped learning curve. It explains how technology transfer overseas should be supported by contractual agreements between the parties concerned. Detailing the legal contractual responsibilities for all parties involved, it also describes what you should do if problems arise during the transfer. Integrating previously unpublished research results with illustrative case studies, this book is suitable for a wide audience within the manufacturing industry including manufacturing engineering students in both developed and developing countries, those responsible for the development of manufacturing engineers in industry and elsewhere, and anyone interested in the international activities of Japanese manufacturing companies.

Review Oak Ridge National Laboratory, 1987 Frameworks for Market Strategy Noel Capon, Frank Go, 2016-12-08

Frameworks for Market Strategy helps students understand how to develop and implement a market strategy and how to manage the marketing process. Marketing activity is the source of insight on the market, customers and competitors, and lies at the core of leading and managing a business. To understand how marketing fits into the broader challenge of managing a business, Capon and Go address marketing management both at the business and functional levels. The book moves beyond merely presenting established procedures, processes and practices, and includes new material based on cutting edge research to ensure students develop strong critical thinking and problem solving skills for success. In this European edition, Capon and Go have retained the strong framework of the book but have updated the cases, examples and discussions to increase the book's relevance for students outside the USA. Key features include:

- A strong strategic focus teaching students how to analyze markets, customers and competitors to plan, execute and evaluate a winning market strategy.
- Practical examples from a range of contexts allowing students to develop the skills necessary to work in for profit, public or non profit firms.
- Emphasis on understanding the importance of working across organizational boundaries to align firm capabilities.
- Full chapters devoted to key topics including brand management, digital marketing, marketing metrics and ethical as well as social responsibilities.
- Focus on globalization with a chapter on regional and international marketing.
- Multiple choice, discussion and essay questions at the end of each chapter.
- Offering an online instructor's manual and a host of useful pedagogy including videos, learning outcomes, opening cases, key ideas, exercises, discussion questions, a glossary and more.

This book will provide a solid foundation in marketing management both for those who will work in marketing.

departments and those who will become senior executives

Sun in a Bottle Charles Seife, 2008-10-30 With his knack for translating science into understandable anecdotal prose and his trademark dry humor award winning science writer Charles Seife presents the first narrative account of the history of fusion for general readers in more than a decade Tracing the story from its beginning into the twenty first century *Sun in a Bottle* reveals fusion's explosive role in some of the biggest scientific scandals of all time Throughout this journey he introduces us to the daring geniuses villains and victims of fusion science With the giant international fusion project ITER International Thermonuclear Experimental Reactor now under construction it's clear that the science of wishful thinking is as strong as ever This book is our key to understanding why
