Japan's Contested War Memories Philip A. Seaton, 2007-03-12 Japan's Contested War Memories is an important and significant book that explores the struggles within contemporary Japanese society to come to terms with Second World War history Focusing particularly on 1972 onwards the period starts with the normalization of relations with China and the return of Okinawa to Japan in 1972 and ends with the sixtieth anniversary commemorations Analyzing the variety of ways in which the Japanese people narrate contest and interpret the past the book is also a major critique of the way the subject has been treated in much of the English language Philip Seaton concludes that war history in Japan today is more divisive and widely argued over than in any of the other major Second World War combatant nations Providing a sharp contrast to the many orthodox statements about Japanese ignorance amnesia and denial about the war this is an engaging and illuminating study that will appeal to scholars and students of Japanese history politics cultural studies society and memory theory *History of Contemporary Japan, 1945-1998* Edward R. Beauchamp, 1998 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company

Local History and War Memories in Hokkaido Philip A. Seaton, 2015-07-24 Hokkaido the northernmost island of Japan barely features in most histories of the Second World War However the combination of distinctive war experiences a vibrant set of local historian groups and powerful media organizations disseminating local war history has generated an identifiable set of local collective memories Hokkaido's status as an early colonial acquisition also makes the island an important vantage point from which to reassess the course and nature of the Japanese Empire This book argues that Hokkaido's experiences of war and its militarized post war constitutes a local case study with a much greater national and international significance on both theoretical and empirical grounds than first impressions might suggest Using Japanese language sources presented for the first time in English and a number of detailed local history case studies it offers a fascinating and hitherto little known perspective on the

Second World War It also combines a comprehensive theory of how war memories operate at the local level within a broad historical context that explains Hokkaido's pivotal role within Japanese imperial history Demonstrating that understanding local history and memories is essential for a nuanced understanding of national history and memories the book will be highly valuable to students and scholars of Japanese history Second World War history and Asian history **A Fearsome Heritage** Dr John Schofield, Wayne Cocroft, 2016-07-08 From massive nuclear test sites to the more subtle material realities of everyday life the influence of the Cold War on modern culture has been profound and global Fearsome Legacies unites innovative work on the interpretation and management of Cold War heritage from fields including archaeology history art and architecture and cultural studies Contributors understand material culture in its broadest sense examining objects in outer space domestic space landscapes and artistic spaces They tackle interpretive challenges and controversies including in museum exhibits heritage sites archaeological sites and other historic and public venues With over 150 color photos and illustrations including a photographic essay readers can feel the profound visual impact of this material culture Memory, History, Nation Susannah Radstone, 2017-09-04 In the last decade a focus on memory in the human sciences has encouraged new approaches to the study of the past As the humanities and social sciences have put into question their own claims to objectivity authority and universality memory has appeared to offer a way of engaging with knowledge of the past as inevitably partial subjective and local At the same time memory and memorial practices have become sites of contestation and the politics of memory are increasingly prominent This interdisciplinary volume demonstrates from a range of perspectives the complex cultural work and struggles over meaning that lie at the heart of what we call memory The chapters in this volume offer a complex awareness of the workings of memory and the ways in which different or changing histories may be explained They explore the relation between individual and social memory between real and imaginary event and fantasy history and myth Contradictory accounts or memories in direct contradiction to the historical record are not always the sign of a repressive authority attempting to cover something up The tension between memory as a safeguard against attempts to silence dissenting voices and memory's own implication in that silencing runs throughout the book Topics covered range from the Basque country to Cambodia from Hungary to South Africa from the Finnish Civil War to the cult Jim Jarmusch movie Dead Man from the Rock and Roll Hall of Fame to Australia Part I Transforming Memory is concerned primarily with the social and personal transmission of memory across time and generations Part II Remembering Suffering Trauma and History brings the after effects of catastrophe to the fore Part III Patterning the National Past the relation between nation and memory is the central issue Part IV And Then Silence reflects on the complex and multiple meaning of silence and oblivion wherein amnesia is often used as a figure for the denial of shameful Memory Politics in the Shadow of the New Cold War Grzegorz Nycz, 2021-12-06 This book addresses memory politics and their evolution as an academic discipline including memory studies It explores national and international debates about conflicting interpretations of the

recent past including WWII remembering the annexation of Ukraine the reformed history teaching in Putin's Russia Historikerstreit and the Holocaust in Germany and the legacy and role of nuclear weapons in international relations in the USA in the context of the so called New Cold War Instrumentalizing the Past Jan Rydel, Stefan Troebst, 2022-09-20 In today's world we can point to many international disputes and interstate conflicts fueled by past events Historical resentments or memories of past suffering or fame are often used to justify political economic and even territorial demands Interstate disputes and historical conflicts should be understood as evidence of political and social tensions related to active serious differences in the assessment of the common past The book explains the role of such conflicts in international relations and suggests ways of classifying them It presents examples of the internationally relevant instrumentalisation of history from different regions of the world and outlines ways of overcoming them **The Routledge Companion to Film History** William Guynn, 2010-09-13 The Routledge Companion to Film History is an indispensable guide for anyone studying film history for the first time Incorporating a series of 11 introductory critical essays on key subject areas with a dictionary of key names and terms it serves to introduce the reader to the field of film history in a comprehensive and well rounded manner **Genocide, Collective Violence, and Popular Memory** David E. Lorey, William H. Beezley, 2001-11-01 The twentieth century has been scarred by political violence and genocide reaching its extreme in the Holocaust Yet at the same time the century has been marked by a growing commitment to human rights This volume highlights the importance of history of socially processed memory in resolving the wounds left by massive state sponsored political violence and in preventing future episodes of violence In *Genocide Collective Violence and Popular Memory The Politics of Remembrance in the Twentieth Century* the editors present and discuss the many different social responses to the challenge of coming to terms with past reigns of terror and collective violence Designed for undergraduate courses in political violence and revolution this volume treats a wide variety of incidents of collective violence from decades long genocide to short lived massacres The selection of essays provides a broad range of thought provoking case studies from Latin America Africa Europe and Asia This provocative collection of readings from around the world will spur debate and discussion of this timely and important topic in the classroom and beyond **The Unpredictability of the Past** Marc Gallicchio, 2007-08-21 Collection explores the formation and uses of memory about the Asia Pacific front of World War II considering how it continues to shape political and diplomatic discourse From History to Theory Kerwin Lee Klein, 2011-05-19 *From History to Theory* describes major changes in the conceptual language of the humanities particularly in the discourse of history In seven beautifully written closely related essays Kerwin Lee Klein traces the development of academic vocabularies through the dynamically shifting cultural political and linguistic landscapes of the twentieth century He considers the rise and fall of philosophy of history and discusses past attempts to imbue historical discourse with scientific precision He explores the development of the meta narrative and the post Marxist view of history and shows how the present resurgence of old words

such as memory in new contexts is providing a way to address marginalized peoples In analyzing linguistic changes in the North American academy *From History to Theory* innovatively ties semantic shifts in academic discourse to key trends in American society culture and politics Heritage and Globalisation Sophia Labadi, Colin Long, 2010-06-17 This volume analyzes the politics policy and practice of cultural heritage at the global level identifying the major directions in which international heritage practice is moving and exploring the key issues likely to shape the cultural heritage field well into the twenty first century It examines the tensions between the universal claims of much heritage practice particularly that associated with the World Heritage system and national and local perspectives It explores the international legal framework developed since World War Two to protect heritage particularly at times of war and from theft showing how contemporary global problems of conflict and illicit trade continue to challenge the international legal system *Heritage and Globalisation* critiques the incorporation of heritage in the world economy through the policies of international development organisations and the global tourism trade It also approaches heritage from seldom considered perspectives as a form of aid as a development paradigm and as a form of sustainable practice The book identifies some of the most pressing issues likely to face the heritage industry at a global level in coming decades including the threat posed by climate change and the need for poverty reduction Providing a historically and theoretically rigorous approach to heritage as a form of and manifestation of globalisation the volume s emphasis is on contemporary issues and new fields for heritage practice
