The Birth of Thought in the Spanish Language Ilia Galán Díez, 2017-03-29 This book takes readers on a philosophical discovery of a forgotten treasure one born in the 14th century but which appears to belong to the 21st It presents a critical up to date analysis of Santob de Carrión also known as Sem Tob a writer and thinker whose philosophy arose in the Spain of the three great cultures Jews Christians and Muslims who then coexisted in peace The author first presents a historical and cultural introduction that provides biographical detail as well as context for a greater understanding of Santob's philosophy Next the book offers a dialogue with the work itself which looks at politics sociology anthropology psychology ethics aesthetics metaphysics and theodicy The aim is not to provide an exhaustive analysis or to comment on each and every verse but rather to deal only with the most relevant for today's world Readers will discover how Santob believed knowledge must be dynamic and tolerance fundamental fleeing from dogma since one cannot avoid a significant dose of moral and aesthetic relativism Subjectivity within its own codes must seek a profound ethics not puritanical but which serves to escape from general ill will Santob offers a criticism of wealth and power that does not serve the people which appears to be totally relevant today In

spite of the fame he achieved in his own time Santob has largely remained a vestige of the past By the end of this book readers will come to see why this important figure deserves to be more widely studied Indeed not only has this medieval Spanish philosopher searched for truth in an unstable confused world of contradictions but he has done so in a way that can still help us today

Distant Tyranny Regina Grafe, 2012-01-08 Spain's development from a premodern society into a modern unified nation state with an integrated economy was painfully slow and varied widely by region Economic historians have long argued that high internal transportation costs limited domestic market integration while at the same time the Castilian capital city of Madrid drew resources from surrounding Spanish regions as it pursued its quest for centralization According to this view powerful Madrid thwarted trade over large geographic distances by destroying an integrated network of manufacturing towns in the Spanish interior Challenging this long held view Regina Grafe argues that decentralization not a strong and powerful Madrid is to blame for Spain's slow march to modernity Through a groundbreaking analysis of the market for bacalao dried and salted codfish that was a transatlantic commodity and staple food during this period Grafe shows how peripheral historic territories and powerful interior towns obstructed Spain's economic development through jurisdictional obstacles to trade which exacerbated already high transport costs She reveals how the early phases of globalization made these regions much more externally focused and how coastal elites that were engaged in trade outside Spain sought to sustain their positions of power in relation to Madrid **Distant Tyranny** offers a needed reassessment of the haphazard and regionally diverse process of state formation and market integration in early modern Spain showing how local and regional agency paradoxically led to legitimate governance but economic backwardness
