History Chemistry I Thomas Thomson:

The History of Chemistry (Complete) Thomas Thomson, 2020-09-28 Chemistry unlike the other sciences sprang originally from delusion and superstition and was at its commencement exactly on a level with magic and astrology Even after it began to be useful to man by furnishing him with better and more powerful medicines than the ancient physicians were acquainted with it was long before it could shake off the trammels of alchymy which hung upon it like a nightmare cramping and blunting all its energies and exposing it to the scorn and contempt of the enlightened part of mankind It was not till about the middle of the eighteenth century that it was able to free itself from these delusions and to venture abroad in all the native dignity of a useful science It was then that its utility and its importance began to attract the attention of the world that it drew within its vortex some of the greatest and most active men in every country and that it advanced towards perfection with an accelerated pace The field which it now presents to our view is vast and imposing Its paramount utility is universally acknowledged It has become a necessary part of education It has contributed as much to the progress of society and has done as much to augment the comforts and conveniences of life and to increase the power and the resources of mankind as all the other sciences put together It is natural to feel a desire to be acquainted with the origin and the progress of such a science and to know something of the history and character of those numerous votaries to whom it is indebted for its progress and improvement The object of this little work is to gratify these laudable wishes by taking a rapid view of the progress of Chemistry from its first rude and disgraceful beginnings till it has reached its present state of importance and dignity I shall divide the subject into fifteen chapters In the first I shall treat of Alchymy which may be considered as the inauspicious commencement of the science and which in fact consists of little else than an account of dupes and impostors every where so full of fiction and obscurity that it is a hopeless and almost impossible task to reach the truth In the second chapter I shall endeavour to point out the few small chemical rills which were known to the ancients These I shall follow in their progress in the succeeding chapters till at last augmented by an infinite number of streams flowing at once from a thousand different quarters they have swelled to the mighty river which now flows on majestically wafting wealth and information to the civilized world

The History of Chemistry. By Thomas Thomson, M.D.F.R.S.E. Professor of Chemistry in the University of Glasgow. In Two Volumes. Vol. I. [-II]. Thomas Thomson (chimiste et géologue).), 1830 The History of Chemistry Thomas Thomson, 1830

Bibliography on the History of Chemistry and Chemical Technology. 17th to the 19th Century Valentin Wehefritz, 2011-06-24 No detailed description available for Bibliography on the History of Chemistry and Chemical Technology 17th to the 19th Century **A Critical Dictionary of English Literature and British and American Authors** Samuel Austin Allibone, 1899 **A critical dictionary of English literature, and British and American authors living and deceased** Samuel Austin Allibone, 1877 A Critical Dictionary of English Literature and British and American Authors Living and Deceased from the Earliest Accounts to the Latter Half of the Nineteenth Century

by S. Austin Allibone ,1871 **A Critical Dictionary of English Literature and British and American Authors**
Allibone,1874 A Critical Dictionary of English Literature, and British and American Authors, Living and Deceased, from the Earliest Accounts to the Middle of the Nineteenth Century Samuel Austin Allibone,1871 *Catalogue of the Books in the Manchester Free Library: Additions from 1864 to 1879. 1 v. in 2. 1879 ,1879* From Chemical Philosophy to Theoretical Chemistry Mary Jo Nye,1994-03-01 How did chemistry and physics acquire their separate identities and are they on their way to losing them again Mary Jo Nye has written a graceful account of the historical demarcation of chemistry from physics and subsequent reconvergences of the two from Lavoisier and Dalton in the late eighteenth century to Robinson Ingold and Pauling in the mid twentieth century Using the notion of a disciplinary identity analogous to ethnic or national identity Nye develops a theory of the nature of disciplinary structure and change She discusses the distinctive character of chemical language and theories and the role of national styles and traditions in building a scientific discipline Anyone interested in the history of scientific thought will enjoy pondering with her the question of whether chemists of the mid twentieth century suspected chemical explanation had been reduced to physical laws just as Newtonian mechanical philosophers had envisioned in the eighteenth century *A Critical Dictionary of English Literature* Samuel Austin Allibone,1871 **The Annual Review and History of Literature ,1803 The Annual review and history of literature, A.
