States Rolf Swensen, 2025-05-21 Christian Science is one of the most unique and controversial of American religions but there has never been a history of this influential metaphysical group best known for its healing through prayer Most attention has previously focused on the church's founder Mary Baker Eddy 1821-1910 This compilation of nine previously published scholarly articles buttressed by additional insight presented in the preface introduction and conclusion should lead to further investigation of this compelling topic This volume investigates the origins of the Christian Science movement illustrates how Eddy's students mainly women helped its rapid spread through healings how Eddy guided and restrained her students examines some denominational growing pains underscores how The Mother Church in Boston and Eddy's Church Manual evolved recounts dozens of testimonies of healing and shows how local or branch churches operated before and after Eddy's passing Contrary to previous assumptions the new Christian religion was surprisingly diverse with almost one half of the membership coming from the lower middle and working classes This vibrant church ultimately declined due to excessive centralization and insufficient utilization of the membership plus lack of social activities and the rise of medical science Recent efforts to revitalize the movement through embracing communities are continuing And O'er Earth's Troubled Angry Sea The History of Christian Science in the United States will appeal to Christian Scientists kindred spirits in the metaphysical world anyone interested in religion and those who read social history Each chapter is suitable for group discussions and for undergraduate or graduate classes *History and Philosophy of the Life Sciences*, 2006 *Entangled Life* Gillian Barker, Eric Desjardins, Trevor Pearce, 2013-09-05 This volume explores the interactions between organisms and their environments and how this entanglement is a fundamental aspect of all life It brings together the work and ideas of historians philosophers biologists and social scientists uniting a range of new perspectives methods and frameworks for examining and understanding the ways that organisms and environments interact The volume is organized into three main sections historical perspectives contested models and emerging frameworks The first section explores the origins of the modern idea of organism environment interaction in the mid nineteenth century and its development by later psychologists and anthropologists In the second section a variety of controversial models from mathematical representations of evolution to model organisms in medical research are discussed and reframed in light of recent questions about the interplay between organisms and environment The third section investigates several new ideas that have the potential to reshape key aspects of the biological and social sciences Populations of organisms evolve in response to changing environments bodies and minds depend on a wide array of circumstances for their development cultures create complex relationships with the natural world even as they alter it irrevocably The chapters in this volume share a commitment to unraveling the mysteries of this entangled life Catalog of Copyright Entries Library of Congress. Copyright Office, 1971 Catalogue of Title-entries of Books and Other Articles ... Library of Congress. Copyright Office, 1891 Life-Span Developmental Psychology John R. Nesselroade, Hayne W. Reese, 2013-09-11 Life Span Developmental Psychology Methodological Issues is based on a

conference held at West Virginia University in 1971 that focused on the general topic of Life Span Developmental Psychology. The conference provided a forum for the discussion of a variety of methodological issues related to the study of developmental processes over the life span. The principal objectives of the Life Span Conference have been not only to explicate by successive approximation the range of empirical phenomena with which a life span developmental psychology should be concerned but also to explore issues about theory, measurement, design and data analysis which bear upon it. The book opens with a chapter on ethical issues in developmental psychology. This is followed by separate chapters on topics such as cross cultural research in developmental psychology, the implications of the two models that have had the greatest impact on developmental psychology, the mechanistic reactive organism model and the organismic active organism model and research strategies and measurement methods for investigating human development.

*Sociology Through Emotions* Scott R. Harris, 2025-02-19 Offering an accessible and intriguing look at emotions in society, *Sociology Through Emotions* collects together contemporary qualitative research that illuminates many of sociology's central concepts and topics from culture, socialization and inequality to family, crime, healthcare, religion and social movements. This book appeals to instructors who want to highlight the social factors that shape emotions as well as the impact of emotions on social life. It is an attractive supplement for courses on introduction to sociology, self and society, social psychology and others focused on interaction, culture and meaning making.

*Willard and Spackman's Occupational Therapy* Barbara A. Schell, Glen Gillen, Marjorie Scaffa, Ellen S. Cohn, 2013-03-08 Willard and Spackman's *Occupational Therapy*, Twelfth Edition, continues in the tradition of excellent coverage of critical concepts and practices that have long made this text the leading resource for Occupational Therapy students. Students using this text will learn how to apply client centered, evidence based approach across the full spectrum of practice settings. Peppered with first person narratives which offer a unique perspective on the lives of those living with disease, this new edition has been fully updated with a visually enticing full color design and even more photos and illustrations. Vital pedagogical features including case studies, Practice Dilemmas and Provocative questions help position students in the real world of occupational therapy practice to help prepare them to react appropriately.

*Cognitive Science and Psychoanalysis* Kenneth Mark Colby, Robert J. Stoller, 2013-12-16 Exploring the connections between cognitive science and psychoanalysis, the authors indicate that a potentially fruitful relationship can exist between the two fields. The book examines this relationship, concluding that psychoanalysis can contribute to a science of the mind when it flows into a more effective science and technology such as cognitive science. As viewed by the authors, cognitive science is a new, lively field full of novel concepts and methods about the mind. This is sharply contrasted with their opinion of psychoanalysis as a discipline which must change and consider such important problems in the study of the mind such as fantasies and feelings. Colby and Stoller do not specify how psychoanalysis must evolve but they do make suggestions for future research. They believe that they are exercising the prerogative of tribal elders, passing the task along to the next.

generation      **Documents of Life 2** Ken Plummer, Kenneth Plummer, 2001-03-20 This study champions the use of life stories and other personal documents in social research. It considers recent developments in the humanist approach to social research looking at writing and narrative memory and the auto biographical society      **Qualitative Psychology** Jonathan A Smith, 2007-12-18 Covering all the main qualitative approaches now used in psychology the Second Edition offers readers a step by step guide to carrying out research using each particular method with plenty of pedagogical advice. All chapters are written by international experts many of them key figures in either the inception or development of their chosen method. Key features of the Second Edition include updated and extended chapters examples of good research studies using each approach text boxes and further readings      **The Routledge International Handbook of Life-Course Criminology** Arjan Blokland, Victor van der Geest, 2017-03-16 Since its introduction in the latter half of the 1980s the meticulous study of distinct criminal career dimensions like onset frequency and crime mix has yielded a wealth of information on the way crime develops over the life span. Policymakers in turn have used this information in their efforts to tailor criminal justice interventions to be both effective and efficient. Life course criminology studies the ways in which the criminal career is embedded in the totality of the individual life course and seeks to clarify the causal mechanisms governing this process. The Routledge International Handbook of Life Course Criminology provides an authoritative collection of international theoretical and empirical research into the way that criminal behavior develops over the life span which causal mechanisms are involved in shaping this development and to what degree criminal justice interventions are successful in redirecting offenders criminal trajectories. Drawing upon qualitative and quantitative research this handbook covers theory describes and compares criminal career patterns across different countries tests current explanations of criminal development and using cutting edge methods assesses the intended and unintended effects of formal interventions. This book is the first of its kind to offer a comprehensive overview of state of the art developments in criminal career and life course research providing unique perspectives and exclusive local knowledge from over 50 international scholars. This book is an ideal companion for teachers and researchers engaged in the field of developmental and life course criminology      *Infertile Environments* Janelle Lamoreaux, 2022-11-18 In *Infertile Environments* Janelle Lamoreaux investigates how epigenetic research into the effects of toxic exposure conceptualizes and configures environments. Drawing on fieldwork in a Nanjing China toxicology lab that studies the influence of pesticides and other pollutants on male reproductive and developmental health Lamoreaux shows how the lab's everyday research practices bring national hormonal dietary maternal and laboratory environments into being. She situates the lab's work within broader Chinese history as well as the contemporary cultural and political moment in which declining fertility rates and reproductive governance and technology are growing concerns. She also points to how toxicology in China is a transnational endeavor tied to both local conditions and international research agendas and infrastructures which highlights the myriad scales and scope of epigenetic environments. At a moment of growing concerns about toxins endocrine

disrupting chemicals and climate change Lamoreaux demonstrates that epigenetic research s proliferation of environments produces new kinds of toxic relations that impact multiple generations of humans      **A Theory of Fields** Neil

Fligstein,Doug McAdam,2015 In recent years there has been an outpouring of work at the intersection of social movement thoery organizational theory economic and political sociology The problems at the core of these areas Fligstein and McAdam argue have a similar analytic and theoretical structure Synthesizing much of this work A Theory of Fields offers a general perspective on how to understand the problems related to understanding change and instability in modern complex societies through a theory of strategic action fields      *Bibliography of Society, Ethics and the Life Sciences* Sharmon Sollitto,Robert M. Veatch,1979 About 1000 references to books journal articles government publications reports and bibliographies Topical arrangement under headings such as History of medical ethics Behavior control and Truth telling in medicine Entries include bibliographical information and occasional brief annotations Author index      **Another Gospel** Ruth A.
