Visible Learning Guide to Student Achievement John Hattie, Eric M. Anderman, 2019-10-28 *Visible Learning Guide to Student Achievement* critically examines the major influences shaping student achievement today. A revision of the *International Guide to Student Achievement*, this updated edition provides readers with a more accessible compendium of research summaries with a particular focus on the school sector. As educators throughout the world seek to enhance learning, the information contained in this book provides practitioners and policymakers with relevant material and research-based instructional strategies that can be readily applied in classrooms and schools to maximize achievement. Rich in information and empirically supported research, it contains seven sections, each of which begins with an insightful synthesis of major findings and relevant updates from the literature since the publication of the first *Guide*. These are followed by key entries, all of which have been recently revised by the authors to reflect research developments. The sections conclude with user-friendly tables that succinctly identify the main influences on achievement and practical implications for educators. Written by world-renowned bestselling authors John Hattie and Eric M. Anderman, this book is an indispensable reference for any teacher, school leader, and parent wanting to maximize learning in our schools.

Actions of Their Own to Learn, 2017-01-01 What does it mean to take actions of one's own to learn? How do human beings create meaning for themselves and with others? How can learners' active efforts to build knowledge be encouraged and supported? In this edited compilation, scholars from a diverse range of academic and professional backgrounds address these questions grounded in the conviction that the ability to take effective action of one's own to learn is itself an essential form of knowledge. In an era of dramatic social, environmental, and political change, the need to access vast amounts of information to make decisions demands that learners become active agents in their own knowledge development. Educators are transforming ideas about their roles as they strive to provide guidance to help learners take the lead in their own learning. Learners are building new ideas about their capacities to gather and organize information while working with others. No longer simply consumers of information, they are beginning to see themselves as capable and effective researchers. Researchers are also expanding ideas about their knowledge-gathering work and identities. No longer simply reporters of information, researchers are seeing themselves as learners as they engage in deeper, more collaborative ways with participants in their research. Chapter authors describe their dedicated and often career-long journeys to show the vital connections between knowledge, acting to learn, identity, and being. To engage in this work means disrupting traditional ideas about how knowledge is most effectively acquired. This book will inspire researchers, educators, and educational planners as they build the kinds of new participative structures needed to support individual and collective actions to learn. Test-Enhanced Learning Kristian Still,2023-05-13 Written by Kristian Still Test Enhanced Learning A practical guide to improving academic outcomes for all studentsis an informative guidebook that explores the wealth of evidence behind and the benefits of test enhanced learning spaced retrieval practice and personalisation Detailing the most up to date research into improving learning and retention it takes us on a journey into test enhanced learning spaced retrieval practice motivation metacognition and personalisation In so doing the book provides a blueprint for all teachers and schools to improve the academic outcomes of their students and to achieve this in ways that improve the motivation of learners and reduces the workload for teachers Kristian Still has been developing these ideas with

his classes for many years and has achieved considerable success in terms of the direct learning gains and improved assessment grades of his pupils and the indirect gains in students' growing confidence in lessons with a wider group of pupils contributing to class and improved classroom behaviour. Consequently, students are finding greater comfort in class and experiencing less pressure or underpreparedness when a question is asked. The book is supported by the free Remembermore app which uses digital flashcards as an aid to deliver the learning gains of personalised spaced retrieval practice, providing teachers with insights into the effectiveness of their own teaching. It also contains a number of practical case studies from teachers using these techniques and the app to produce great results in their schools. Spaced retrieval practice is a highly effective but counter-intuitive revision technique in that it involves forgetting and relearning knowledge. Test Enhanced Learning provides a blueprint for motivating students to adopt this technique in favour of seemingly easier but less effective techniques such as re-reading. Moreover, the Remembermore app does most of the convincing for you. It is a tool not only to provide the flashcards for retrieval practice but also to demonstrate the power of the technique to pupils. The book goes a step beyond mere retrieval practice, offering a fresh approach to test-enhanced learning, both pre-testing and post-testing, supported by real classroom-based routines that have been tried and tested by both Primary and Secondary teachers across a range of subjects. Exploring the research behind test-enhanced learning, it reveals that both pre-testing and post-testing retrieval practice offers improved memorisation and secures long-term learning. Suitable for all teachers in all settings.

Teaching Tech Together Greg Wilson, 2019-10-08. Hundreds of grassroots groups have sprung up around the world to teach programming, web design, robotics and other skills outside traditional classrooms. These groups exist so that people don't have to learn these things on their own but ironically their founders and instructors are often teaching themselves how to teach. There's a better way. This book presents evidence-based practices that will help you create and deliver lessons that work and build a teaching community around them. Topics include the differences between different kinds of learners, diagnosing and correcting misunderstandings, teaching as a performance art, what motivates and demotivates adult learners, how to be a good ally, fostering a healthy community, getting the word out and building alliances with like-minded groups. The book includes over a hundred exercises that can be done individually or in groups, over 350 references and a glossary to help you navigate educational jargon.
