Home Delivery Barry Bergdoll, Peter Christensen, 2008 Edited by Barry Bergdoll Peter Christensen Texts by Barry Bergdoll Peter Christensen Ken Tadashi Oshima Rasmus Waen **Dwell**, 2008-07 At Dwell we re staging a minor revolution We think that it s possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines **Small Scale, Big Change** Andres Lepik, 2010 Published to accompany the exhibition held at the Museum of Modern Art New York 28 Sept 2010 3 Jan 2011 **Sustainable Architecture in Vorarlberg** Ulrich Dangel, 2009-11-20 The successful combination of a regional building style of sophisticated simplicity with sustainable construction methods has made the architecture of Vorarlberg Austria a model for the rest of the world This book presents particularly successful projects from recent years involving various building types and portrays their development from design idea to built detail The documented structures by Cukrowicz Nachbaur Christian Lenz Oskar Leo Kaufmann Albert R f Hermann Kaufmann Dietrich Untertrifaller Baumschlager Eberle Marte Marte and Martin Rauch place the focus on their energy strategy and formally ambitious construction methods All of the plans and detail drawings were specially prepared for the book which makes it easy to compare the projects New Frontiers in Light Metals Laurens Katgerman, Frans Soetens, 2010 Held at the Auditorium of the Eindhoven University of Technology Eindhoven the Netherlands on 23 25 June 2010 t p **Transnational Discourses in Nordic Design** Astrid Skjerven, Rachel Gotlieb, 2024-11-14 Challenging the stereotypes of Scandinavian design these essays explore design in Denmark Norway and Sweden and assess the different roles that Finland and the wider Nordic region had in forming an image of Scandinavian design throughout the world By examining the legacy of Nordic design and its global impact editors Astrid Skjerven and Rachel Gotlieb shed light on the development of national and regional design identities and their historical associations Authors investigate the transnational circulation of ideas throughout the later 20th century and consider the influences on design practices production and consumerism They look at how different countries negotiated and promoted Nordic branding and ideology and offer new perspectives on design in relation to sustainability changing economies and indigenous traditions A range of leading international scholars evaluate the popularity of Nordic style in Soviet material culture the influence on jewellery design in post war Britain the impact of national design conferences exhibitions and education in Europe the USA Canada and Japan Drawing from a wealth of archival material and interviews with designers makers and other stakeholders this book reveals a lesser known history of cross cultural collaborations exhibition production and tensions between mainstream and indigenous design in Scandinavia Transnational Discourses in Nordic Design also provides an insight into some of the authors own design practices and reveals the challenges facing Nordic designers today **The Ecologies of the Building Envelope** Alejandro Zaera-Polo, Jeffrey

Anderson,2021-05-11 The Ecologies of the Envelope theorizes the building envelope as a literal embodiment of the social political technological and economic contingencies which have become embedded within it over the last century analyzing the historical lineages heroes and villains that helped define the complex material ecologies we see within the envelope today While the facade is one of the most thoroughly theorized elements of architecture it is also one of the most questioned since the end of the 19th century Within the discipline of architecture the traditional understanding of the facade focuses primarily on semiotic and compositional operations such as proportional laws and linguistic codes which are deployed on the building's surface In contrast to this our material and environmental theory of the envelope proposes that the exponential development of building technologies since the mid 19th century coupled with new techniques of management and regulation have diminished the compositional and ornamental capacities of the envelope in favor of material quantitative and technical performances Rather than producing a stylistic analysis of the facade we investigate the historical lineages of the performances components assembly types and material entanglements that constitute the contemporary building envelope

Mass Customisation and Personalisation in Architecture and Construction Poorang A.E. Piroozfar, Frank T.

Filler,2013-06-19 Challenged by the recent economic crisis the building and construction industry is currently seeking new orientation and strategies Here mass customisation is uncovered as a key strategy in helping to meet this challenge The term mass customisation denotes an offering that meets the demands of each individual customer whilst still being produced with mass production efficiency Today mass customisation is emerging from a pilot stage into a scalable and sustainable strategy The first dedicated publication of its kind this book provides a forum for the concept within an applied and highly innovative context The book includes contributions from some of the most prominent thinkers and practitioners in the field from across the world including Kasper S Vibaek Steve Kendall Martin Bechthold Mitchell M Tseng and Masa Noguchi Bringing together this panel of experts who have carried out research both in academia and practice this book provides an overview of state of the art practice related to the concept of customisation and personalisation within the built environment **Kenzo Tange**

and the Metabolist Movement Zhongjie Lin,2023-08-31 Amid Japan's political turbulence in 1960 seven architects and designers founded Metabolism to propagate radical ideas of urbanism Kenzo Tange's Plan for Tokyo 1960 further celebrated urban expansion as organic processes and pushed city design to an unprecedented scale Metabolists' visionary schemes of the city gave birth to revolutionary design paradigms which reinvented the discourse of modern Japanese architecture and propelled it through the years of Economic Miracle to a global prominence Their utopian concepts which often envisaged the sea and the sky as human habitats of the future reflected fundamental issues of cultural transformation and addressed environmental crises of the postindustrial society This new edition expands Zhongjie Lin's pathbreaking account on Tange and Metabolism centered at the intersection of urbanism and utopianism The thorough historical survey from Metabolism's inauguration at the 1960 World Design Conference to the apex of the movement at Expo 70 and further to the recent
