Green Architecture And The Agrarian Garden:

Green Architecture and the Agrarian Garden Barbara Stauffacher Solomon, 1988 **Green architecture and the agrarian garden** B.S. Solomon, **Garden History** John Dixon Hunt, 1992 This collection of essays explores the issues methods and approaches that students in landscape architecture have developed during that period to cope with the expanding subject of gardens and their history The volume will serve as a bench mark in the field with its range of approaches and wealth of illustrative material Each contributor focuses upon a specific piece of his or her research and uses this as a basis to discuss the wider implications of the study of gardens within such contexts as botanical horticultural agrarian literary technological social culture political and art history Provided by publisher [Of Gardens](#) Paula Deitz, 2011-11-29 Paula Deitz has delighted readers for more than thirty years with her vivid descriptions of both famous and hidden landscapes Her writings allow readers to share in the experience of her extensive travels from the waterways of Britain s Castle Howard to the Japanese gardens of Kyoto and home again to New York City s Central Park Collected for the first time the essays in [Of Gardens](#) record her great adventure of continual discovery not only of the artful beauty of individual gardens but also of the intellectual and historical threads that weave them into patterns of civilization from the modest garden for family subsistence to major urban developments Deitz s essays describe how people over many centuries and in many lands have expressed their originality by devoting themselves to cultivation and conservation During a visit to the Abby Aldrich Rockefeller Garden in Seal Harbor Maine Deitz first came to appreciate the notion that landscape architecture can be as intricately conceived as any major structure and is indeed the means by which we redeem the natural environment through design Years later as she wandered through the gardens of Versailles she realized that because gardens give structure without confinement they encourage a liberation of movement and thought In [Of Gardens](#) we follow Deitz down paths of revelation viewing A Bouquet of British Parks Liverpool Edinburgh and London the parks and promenades of Jerusalem the Moonlight Garden of the Taj Mahal a Tuscan style villa in southern California and the rooftop garden at Tokyo s Mori Center among many other sites Deitz covers individual landscape architects and designers including Andr Le N tre Frederick Law Olmsted Beatrix Farrand Russell Page and Michael Van Valkenburgh She then features an array of parks public places and gardens before turning her attention to the burgeoning business of flower shows The volume concludes with a memorable poetic epilogue entitled A Winter Garden of Yellow **Designing San Francisco** Alison Isenberg, 2024-09-24 A major urban history of the design and development of postwar San Francisco [Designing San Francisco](#) is the untold story of the formative postwar decades when U S cities took their modern shape amid clashing visions of the future In this pathbreaking and richly illustrated book Alison Isenberg shifts the focus from architects and city planners those most often hailed in histories of urban development and design to the unsung artists activists and others who played pivotal roles in rebuilding San Francisco between the 1940s and the 1970s Previous accounts of midcentury urban

renewal have focused on the opposing terms set down by Robert Moses and Jane Jacobs put simply development versus preservation and have followed New York City models Now Isenberg turns our attention west to colorful pioneering and contentious San Francisco where unexpectedly fierce battles were waged over iconic private and public projects like Ghirardelli Square Golden Gateway and the Transamerica Pyramid When large scale redevelopment came to low rise San Francisco in the 1950s the resulting rivalries and conflicts sparked the proliferation of numerous allied arts fields and their professionals including architectural model makers real estate publicists graphic designers photographers property managers builders sculptors public interest lawyers alternative press writers and preservationists Isenberg explores how these centrally engaged arts professionals brought new ideas to city regional and national planning and shaped novel projects across urban suburban and rural borders San Francisco's rebuilding galvanized far reaching critiques of the inequitable competition for scarce urban land and propelled debates over responsible public land stewardship Isenberg challenges many truisms of this renewal era especially the presumed male domination of postwar urban design showing how women collaborated in city building long before feminism's impact in the 1970s An evocative portrait of one of the world's great cities *Designing San Francisco* provides a new paradigm for understanding past and present struggles to define the urban future

The Oxford Dictionary of Architecture James Stevens Curl, Susan Wilson, 2015-02-26 Containing over 6 000 entries from Aalto to Zwinger and written in a clear and concise style this authoritative dictionary covers architectural history in detail from ancient times to the present day It also includes concise biographies of hundreds of architects from history excluding living persons from Sir Francis Bacon and Imhotep to Liang Shu-cheng and Francis Inigo Thomas The text is complemented by over 260 beautiful and meticulous line drawings labelled cross sections and diagrams These include precise drawings of typical building features making it easy for readers to identify particular period styles This third edition of *The Oxford Dictionary of Architecture* has been extensively revised and expanded with over 900 new entries including hundreds of definitions of garden and landscape terms such as Baroque garden floral clock hortus conclusus and Zen garden design Each entry is followed by a mini bibliography with suggestions for further reading The full bibliography to the first edition previously only available online has also been fully updated and expanded and incorporated into this new edition This is an essential work of reference for anyone with an interest in architectural and garden history With clear descriptions providing in depth analysis it is invaluable for students professional architects art historians and anyone interested in architecture and garden design and provides a fascinating wealth of information for the general reader

Cultivating Sacred Space Elizabeth Murray, 1997 Linda Greenlaw hadn't been blue water fishing for ten years since the great events chronicled in *The Perfect Storm* and *The Hungry Ocean* when an old friend offered her the captancy on his boat Seahawk for a season of swordfishing She took the bait of course and thus opened a new chapter in a life that had already seen enough adventure for three lifetimes The Seahawk turns out to be the rustiest of buckets with sprung busted and ancient equipment

guaranteed to fail at any critical moment Life is never dull out on the Grand Banks and no one is better at capturing the flavor and details of the wild ride that is swordfishing from the technical complexities of longline fishing and the nuances of reading the weather and waves to the sheer beauty of the open water The trip is full of surprises a bit harder and saltier than I had hoped for but none more unexpected than when the boat's lines inadvertently drift across the Canadian border and she lands in jail Seaworthy is about nature human and other about learning what you can control and what you do when fate takes matters out of your control It's about how a middle-aged woman who sets a high bar for herself copes with challenge and change and frustration about the struggle to succeed or fail on your own terms and above all about learning how to find your true self when you're caught between land and sea **Greater Perfections** John Dixon Hunt, 2000 Greater Perfections explores the meanings of garden and its relationship to other interventions into the natural world But above all it offers a new and challenging account of the role of representation in garden art Journal **Ecopolis** Paul F.

Downton, 2008-12-09 From 2008 for the first time in human history half of the world's population now live in cities Yet despite a wealth of literature on green architecture and planning there is to date no single book which draws together theory from the full range of disciplines from architecture planning and ecology which we must come to grips with if we are to design future cities which are genuinely sustainable Paul Downton's Ecopolis takes a major step along this path It highlights the urgent need to understand the role of cities as both agents of change and means of survival at a time when climate change has finally grabbed world attention and it provides a framework for designing cities that integrates knowledge both academic and practical from a range of relevant disciplines Identifying key theorists practitioners places and philosophies the book provides a solid theoretical context which introduces the concept of urban fractals and goes on to present a series of design and planning tools for achieving Sustainable Human Ecological Development SHED Combining knowledge from diverse fields to present a synthesis of urban ecology the book will provide a valuable resource for students researchers and practitioners in architecture construction planning geography and the traditional life sciences *Garden*, 1987 **The Utne Reader**, 1990-07 **Drawing on Architecture** Jordan Kauffman, 2019-03-19 How architectural drawings emerged as aesthetic objects promoted by a network of galleries collectors and institutions and how this changed the understanding of architecture Prior to the 1970s buildings were commonly understood to be the goal of architectural practice architectural drawings were seen simply as a means to an end But just as the boundaries of architecture itself were shifting at the end of the twentieth century the perception of architectural drawings was also shifting they began to be seen as autonomous objects outside the process of building In Drawing on Architecture Jordan Kauffman offers an account of how architectural drawings promoted by a network of galleries and collectors exhibitions and events emerged as aesthetic objects and ultimately attained status as important cultural and historical artifacts and how this was both emblematic of changes in architecture and a catalyst for these changes Kauffman traces moments of critical importance to the evolution of the perception of

architectural drawings beginning with exhibitions that featured architectural drawings displayed in ways that did not elucidate buildings but treated them as meaningful objects in their own right When architectural drawings were seen as having intrinsic value they became collectible and Kauffman chronicles early collectors galleries and sales He discusses three key exhibitions at the Leo Castelli Gallery in New York other galleries around the world that specialized in architectural drawings the founding of architecture museums that understood and collected drawings as important cultural and historical artifacts and the effect of the new significance of architectural drawings on architecture and architectural history Drawing on interviews with more than forty people directly involved with the events described and on extensive archival research Kauffman shows how architectural drawings became the driving force in architectural debate in an era of change Living with the Sea Mike Brown, Kimberley Peters, 2018-10-03 The seas and oceans are currently taking centre stage in academic study and public consciousness From the plastics littering our seas to the role of climate change on ocean currents from unequal access of marine resources to the treacherous experiences of seafarers who keep our global economy afloat now is a crucial time to examine how we live with the sea This ambitious book brings together an interdisciplinary and international cohort of contributors from within and beyond academia It offers a range and diversity of insights unlike previous collections An oceanic turn is taking place with a burgeoning of academic work that takes seriously the place of seas and oceans in understanding socio cultural and political life past and present Yet there is a significant gap concerning the ways in which we engage with seas and oceans with a will to enliven action and evoke change This book explores these challenges offering insights from spatial planning architectural design geography educational studies anthropology and cultural studies An examination through these lenses can help us to better understand human relationships with the seas and oceans and promote an ethic of care for the future Architectural Record ,1989 **Designing Information** Joel Katz, 2012-08-20 The book itself is a diagram of clarification containing hundreds of examples of work by those who favor the communication of information over style and academic postulation and those who don't Many blurbs such as this are written without a thorough reading of the book Not so in this case I read it and love it I suggest you do the same Richard Saul Wurman This handsome clearly organized book is itself a prime example of the effective presentation of complex visual information eg magazine It is a dream book we were waiting for on the field of information On top of the incredible amount of presented knowledge this is also a beautifully designed piece very easy to follow Krzysztof Lenk author of Mapping Websites Digital Media Design Making complicated information understandable is becoming the crucial task facing designers in the 21st century With Designing Information Joel Katz has created what will surely be an indispensable textbook on the subject Michael Bierut Having had the pleasure of a sneak preview I can only say that this is a magnificent achievement a combination of intelligent text fascinating insights and oh yes graphics Congratulations to Joel Judith Harris author of Pompeii Awakened A Story of Rediscovery Designing Information shows designers in all fields from user interface design to
