Jouvet**

Green Capital A New Perspective On Growth:

Green Capital Christian de Perthuis, Pierre-André Jouvét, 2015-10-13 Many believe economic growth is incompatible with ecological preservation Green Capital challenges this argument by shifting our focus away from the scarcity of raw materials and toward the deterioration of the great natural regulatory functions such as the climate system the water cycle and biodiversity Although we can find substitutes for scarce natural resources we cannot replace a natural regulatory system which is incredibly complex It is therefore critical that we introduce a new price into the economy that measures the costs of damage to these regulatory functions This change in perspective justifies such innovations as the carbon tax which addresses not the scarcity of carbon but the inability of the atmosphere to absorb large amounts of carbon without upsetting the climate system Brokering a sustainable peace between ecology and the economy Green Capital describes a range of valuation schemes and their contribution to the goals of green capitalism proposing a new approach to natural resources that benefits both businesses and the environment

Guerrilla Ecologies John Maerhofer, 2024-03-25 This book intervenes in contemporary debates about climate activism militancy and strategy that have been gathering force in radical ecological circles It responds to some of the urgent questions about utilizing militancy as part of the overall effort to foster an ecosocialist society Building upon the crucial work of scholars and activists from the 1970s to the present such as Carolyn Merchant Ursula Heise Raj Patel Joan Martinez Alier Neil Smith and Mark Dowie this book discusses and regenerates key principles of guerrilla ecology It presents a significant critique of green capital and its impact on the shape of environmental and climate justice movements From car manufacturers dedicating profits to reforestation to big oil conglomerates funneling money into universities that are developing techno fixes which may stave off ecological disaster green capital has become the mainstay of contemporary cultural political and economic reproduction aiming to fuse profitability and sustainability The book brings together discussion on key topics in a range of contexts including biopiracy and biocolonialism indigenous resistance extractivism anti imperialism ecotage and eco militancy It will attract scholarly readers from diverse spaces in the environmental humanities environmental and climate justice radical ecology and philosophy

Measures and Meanings of Spatial Capital Lars Marcus, 2025-02-25 How the built environment understood as spatial capital governs both everyday life in cities and urban systems more generally In an age of social and environmental crises we need to critically rethink the role of the built environment and how best to put it to work Measures and Meanings of Spatial Capital presents a new theory of spatial capital arguing that spatial form is essential for building resilience into highly complex urban systems Lars Marcus argues that the built environment constitutes a form of capital that enhances other forms of capital in cities such as social economic and ecological capital if designed with those goals in mind This represents an important and necessary shift in how we approach urban space in the numerous studies of cities that are conducted in a range of disciplines today such as urban sociology urban economics and urban ecology In contemporary urban studies land has oddly lost its position alongside labor

and capital as one of the three fundamental production factors in economic theory but as Marcus shows misconceptions of land are at the root of social and environmental crises worldwide By defining the challenges and modeling our use of spatial form to enhance improve land and then synthesizing data into a unified theory of spatial capital Marcus provides a crucial reframing of how we can best plan and design our cities for the global challenges we are facing

Women's Political Leadership for Sustainable Development Anna-Katharina von Stauffenberg, 2025-02-11 This book posits that women's political leadership is vital for transitions to a sustainable future It investigates the unsustainability of the current social order offers strategies for achieving sustainable development and explores the structure and agency variables that enable women political leaders to successfully drive political innovations for a greater societal transformation This book sheds light on the genesis of the current capitalist social order the transformational role of the state political leadership political innovations and particularly women leaders in driving sustainable development The book analyses three case studies of women leaders who have successfully implemented political innovations for sustainable statehood and development on national regional and local governance levels Jacinda Ardern Carole Delga and Val rie Plante From these case studies the author demonstrates which agency and structural prerequisites are crucial for women political leaders to become a driving force behind creating the conditions needed for a sustainable future Taking both a theoretical and an empirical approach this is key reading for graduate students and researchers interested in political leadership gender and politics political innovations sustainability sciences and transition research It will also be of interest to political leaders and those advising them looking to understand the leadership styles skills and strategies needed to successfully drive progressive political agendas for sustainable statehood and development

Stability, Growth and Sustainability Aris Ananta, Chang Yau Hoon, Mahani Hamdan, 2023-01-18 As in many other oil and gas dependent countries Brunei Darussalam a country with a small population but the second highest income per capita in Southeast Asia has been diversifying its economy in three sectors from oil and gas to other sectors of export economic growth from the dominance of public sector employment to a more balanced public and private sectors employment and from heavy dependence on foreign labours to development of local talents This book examines the current socio economic development in the journey toward a diversified social economy as targeted in Brunei Vision 2035 By examining the unique context of Brunei this book fills in the gap on studies focusing on socio economic diversification It highlights the importance of the environment digital technology and human capital in the diversification process The book culminates with analyses on business economy employment and welfare in Brunei toward 2035 with a new face a digitalized sustainable and self reliant society with a highly developed human capital and a flourishing private sector This is a very useful analysis of the challenges facing Brunei Darussalam as the country prepares itself for the 21st century We are in an unprecedented period of human connectivity facilitated by an increasingly digitalised and high tech world The transition which the people policy and business sectors have to undergo and survive is a fascinating

learning journey for a small state This book has succinctly highlighted the experiences we should pick up and apply where relevant for our respective countries going forward Ambassador Ong Keng Yong Executive Deputy Chairman S Rajaratnam School of International Studies Nanyang Technological University Singapore and the 11th Secretary General of ASEAN This forward looking study of the Brunei economy is timely and topical Appropriately the authors identify diversification as the country's key economic challenge in preparation for the exhaustion of oil reserves and as the world progressively decarbonises To this end they set out a comprehensive reform agenda focused on education the labour market social policy the development of non oil industries environmental objectives and much else This is a very useful and informative guide not only for the Brunei government and society but also for neighbouring ASEAN member states Professor Emeritus Hal Hill Australian National University This collection fills a considerable gap in our knowledge of the socio economic circumstances and developmental trajectories of Brunei Darussalam In particular it serves as a major and much needed contribution to our understanding of the challenges of economic diversification in an oil and gas dependent sultanate Professor Emeritus Victor T King University of Leeds This book aims to identify and discuss the various issues about challenges faced by and opportunities from Brunei's diversification of her oil dependent economy in response to the changing economic landscape at the national regional and global levels The various chapters provide a comprehensive analysis of the different sectors of Brunei's economy and the authors clear discussion of their arguments and justifications that are substantiated with relevant data and graphical illustrations and a wide range of primary and secondary materials I would like to congratulate the authors for this excellent book and recommend it to those who are interested in knowing and understanding Brunei's economy Associate Professor Teofilo C Daquila National University of Singapore

Resilient Democratic Governance

Girol Karacaoglu,2024-02-08 Girol Karacaoglu proposes a comprehensive framework advocating for the harmonious integration of diversity and interconnectedness in social structures emphasizing their pivotal role in building resilience and achieving sustainable wellbeing Soil-Water, Agriculture, and Climate Change Swatantra Kumar Dubey,Prakash Kumar Jha,Pankaj Kumar Gupta,Aliva Nanda,Vivek Gupta,2022-11-05 This book presents an exploration of linkages among soil water agriculture and climate change with a special focus on thematic areas for assessment mitigation and management of natural resources under climate change conditions This book covers advances in modelling approaches including machine learning ML artificial intelligence AI applications GIS and remote sensing sensors impacts of climate change on agriculture subsurface water contaminants and socio economic impacts which are lacking in a more comprehensive manner in the previous titles This book encompasses updated information as well as future directions for researchers working in the field of management of natural resources The goal of this book is to provide scientific evidence to researchers and policymakers and end to end value chain practitioners which may help in reducing the overall adverse impacts of climate change on water resources and the related mitigation strategies This book focuses on the knowledge modern tools and techniques i e machine

learning artificial intelligence etc for soil water agriculture and climate change Further nature based solutions for management of natural resources with special targets on contaminants extreme events disturbances etc will be targeted The book provides readers with the enhanced knowledge for application of engineering principles and economic and regulatory constraints to determine a soil water agriculture production action strategy and select appropriate technologies to implement the strategy for a given data set at a site It would also cover the application of laboratory modeling numerical methods for determination and forecasting of climate change impacts agriculture production pollution soil health etc Overall it provides hydrologists environmental engineers administrators policy makers consultants and industrial experts with essential support in effective management of soils health agricultural productions and mitigation of extreme climatic events **Agricultural**

development: New perspectives in a changing world Otsuka, Keijiro, ed., Fan, Shenggen, ed., 2021-01-14 Agricultural Development New Perspectives in a Changing World is the first comprehensive exploration of key emerging issues facing developing country agriculture today from rapid urbanization to rural transformation to climate change In this four part volume top experts offer the latest research in the field of agricultural development Using new lenses to examine today's biggest challenges contributors address topics such as nutrition and health gender and household decision making agrifood value chains natural resource management and political economy The book also covers most developing regions providing a critical global perspective at a time when many pressing challenges extend beyond national borders Tying all this together Agricultural Development explores policy options and strategies for developing sustainable agriculture and reducing food insecurity and malnutrition The changing global landscape combined with new and better data technologies and understanding means that agriculture can and must contribute to a wider range of development outcomes than ever before including reducing poverty ensuring adequate nutrition creating strong food value chains improving environmental sustainability and promoting gender equity and equality Agricultural Development New Perspectives in a Changing World with its unprecedented breadth and scope will be an indispensable resource for the next generation of policymakers researchers and students dedicated to improving agriculture for global wellbeing **Intergenerational Wellbeing and**

Public Policy Girol Karacaoglu, Jacek B. Krawczyk, Anita King, 2019-01-28 The distinctive contribution of this book is the formulation of an integrated social environmental and economic framework for public policy This contribution is realised through investigations and conclusions in the following four domains a formal stylised model that provides a platform for an integrated approach to public policy a policy informing simulation model that can be used to operationalise the public policy insights proposed in the stylised model the implications of introducing fundamental or radical uncertainty and complexity into the policy framework and the use of viability theory to demonstrate how one can think of and implement public policy in an uncertain and complex world when the focus of policy needs to shift to building resilience to systemic risks The book's stylised model is constructed by weaving together threads from the wellbeing human needs complex systems sustainable

development endogenous economic growth directed technical change and credit based money literatures Throughout the perspective is that of a policy adviser to a wellbeing state as distinct from a welfare state The key linkages or relationships in the model are supported by empirical evidence that draws on the wider literature in related fields **New Perspectives on Global Governance** Michele Fratianni, Paolo Savona, 2017-09-08 On its 30th anniversary in 2004 responsibility for hosting the G8 Summit fell into the hands of an allegedly unilateralist America An America still reeling from the shock of the September 11th terrorist attacks the resulting economic recession bitter divisions with its NATO allies and disappointment with the United Nations Institutions over the 2003 Iraq war So why does America still need the G8 New Perspectives on Global Governance offers new insight into the role of the Group of Eight s major market democracies and challenges the assumption that the G8 is simply a forum for binding a unilateralist hegemonic America In contrast to seeing the G8 as a means of imposing an American world order this unique collection of new writings suggests that a now vulnerable America must rely on the G8 as a central instrument of foreign policy America needs the G8 to achieve its security economic and political interests in the world and to shape the twenty first central global order it so desperately wants **Islamic Finance and Circular Economy** Syed Nazim Ali, Zul Hakim Jumat, 2021-12-04 This book is the first of its kind to provide a critical overview and theoretical analysis of the Circular Economy from Shariah and Islamic Finance perspectives The book is divided into three parts The contributing authors pay close attention to Islamic Finance in light of sustainability and value creation It also includes case studies on the Circular Economy application in Islamic Finance industry The book is of interest to academics students and practitioners on Islamic Economics and Finance who have an interest in understanding the Circular Economy under the lens of Islamic Finance principles and applications **New Perspectives on Industrial Policy for a Modern Britain** David Bailey, Keith Cowling, Phil Tomlinson, 2015 In the aftermath of the global financial crisis of 2008 and the ensuing Great Recession of 2008 to 2013 the economic debate has begun to shift towards rebalancing the UK economy away from an over reliance upon consumerism and the financial sector to generate growth towards more sustainable productive activities The fallout from the financial crisis exposed the systemic failings of the dominant neo liberal model to deliver balanced growth and there is now increasing recognition this rebalancing might best be achieved through the state pursuing an active industrial policy Thus after a long hiatus industrial policy is back in vogue at regional national and EU levels driven by concerns over competitiveness globalisation de industrialisation unemployment and the comparatively slow growth of the British and EU economies especially in this post recession phase At the same time industrial policy has been seen as a catalyst for designing economic recovery strategies at regional national and EU levels as well as being a concerted strategy to develop new clean tech industries to tackle environmental challenges This book brings together leading European based experts each with a long standing interest in industrial policy The chapters offer a broad set of perspectives on the many facets of industrial policy including reflections upon past experiences of industrial policy from across the globe and

critical analysis and advice upon contemporary UK industrial policy issues They aim to critically inform and challenge policy makers policy think tanks industrialists trade unions academics and other stakeholders in framing the future course for industrial policy in the UK and indeed more widely

New Perspectives on Structural Change Ludovico Alcorta, Neil Foster-McGregor, Bart Verspagen, Adam Szirmai, 2021-03-23

New Perspectives on Structural Change is a comprehensive edited volume that outlines both the historical roots and state of the art debates on the role of structural change in the process of economic development including both orthodox and heterodox perspectives and contributions from prominent scholars in this field The volume consists of four main sections The first section covers the theoretical foundations of the structural change literature The second section presents an empirical overview of the major trends of structural change using up to date data sources and methods The third section presents a broad ranging empirical analysis of the drivers of structural change The fourth section examines how processes such as inclusive growth poverty reduction productive employment the global income distribution and environmental sustainability are affected by structural change and how they can be influenced by policy

Radical Ecological Economics and Accounting to Save the Planet Jacques Richard, 2022-08-18

The solutions and tools generally offered to policymakers on environmental issues such as carbon pricing and environmental taxation most often emanate from neoclassical economists This book shows that the tools of these economists are ineffective for the job and must be replaced by methods from the sphere of ecological accounting The work has four main themes First the book provides a presentation and criticism of the tools traditionally proposed by neoclassical economists Adopting a historical perspective this section shows how these tools have evolved over time and explores some of the theoretical criticisms which have been leveled at them Second the book shows how mainstream economists have moved away from more pragmatic and efficient solutions because of their ignorance of the realities of management in particular corporate accounting and their ideologically driven desire to avoid attacking the capitalist model Third a toolkit of anti capitalist ecological accounting is outlined showcasing the distinct advantages of this approach for the environmental crises And finally the book considers the concrete possibilities of a rapid application of these new tools to combat the immediate threats we are facing The book will interest all readers who want to understand how anti capitalist ecological accounting can contribute to cooling and saving the planet in particular readers in ecological economics and accounting

The New Palgrave Dictionary of Economics, 2016-05-18
