Green Psychology Transforming Our Relationship To The Earth:

Green Psychology Ralph Metzner, 1999-06-01 A visionary ecopsychologist examines the rift between human beings and nature and shows what can be done to bring harmony to both the ecosystem and our own minds Shows that the solution to our ecological dilemma lies in our own consciousnesses It is becoming more and more apparent that the causes and cures for the current ecological crisis are to be found in the hearts and minds of human beings For millennia we existed within a religious and psychological framework that honored the Earth as a partner and worked to maintain a balance with nature But somehow a root pathology took hold in Western civilization the idea of domination over nature and this led to an alienation of the human spirit that has allowed an unprecedented destruction of the very systems which support that spirit In Green Psychology Ralph Metzner explores the history of this global pathology and examines the ways that we can restore a healing relationship with nature His search for role models takes him from shamanic ceremonies with the Lacandon Maya of Mexico to vision quests in the California desert from the astonishing nature mysticism of Hildegard von Bingen to the Black Goddesses and Green Gods of our pagan ancestors He examines the historical roots of the split between humans and nature showing how first sky god worshiping cultures then monotheisms and finally mechanistic science continued to isolate the human psyche from the life giving Earth His final chapters present a solution showing that disciplines such as deep ecology and ecofeminism are creating a worldview in which the mind of humanity and the health of the Earth are harmoniously intertwined

fellow psychedelic researchers share stories from their work with Ralph illuminating his depth of knowledge and broad impact This book paints a complete portrait of Ralph Metzner in his well known roles as therapist and psychedelic pioneer and as an intrepid explorer of consciousness until the very end of his life **Dying to Know** Love Serve Remember Foundation,2024-10-15 Dying to Know is an intimate portrait of two complex controversial characters Ram Dass and Timothy Leary in an epic friendship that shaped a generation In the 1960s Harvard psychology professors Timothy Leary and Richard Alpert began probing the edges of consciousness through their experiments with psychedelics Leary became an LSD guru igniting a global counterculture movement and landing in prison after Nixon called him the most dangerous man in America Alpert journeyed to the East and became Ram Dass a spiritual teacher for an entire generation and the author of Be Here Now Including interviews spanning 50 years Dying to Know celebrates the lasting legacy of Leary and Alpert and encourages critical thinking about life drugs and the biggest mystery of all death **People Trees** David L. Haberman,2013-04-25 This is a book about religious conceptions of trees within the cultural world of tree worship at the tree shrines of northern India Sacred trees have been worshipped for millennia in India and today tree worship continues there among all segments of society In the past tree worship was regarded by many Western anthropologists and scholars of religion as a prime example of childish animism or decadent popular religion More recently this aspect of world religious cultures is almost completely ignored in the theoretical concerns of the day David Haberman hopes to demonstrate that by seriously investigating the world of Indian tree worship we can learn much about not only this prominent feature of the landscape of South Asian religion but also something about the cultural construction of nature as well as religion overall The title People Trees relates to the content of this book in at least six ways First although other sacred trees are examined the pipal arguably the most sacred tree in India receives the greatest attention in this study The Hindi word pipal is pronounced similarly to the English word people Second the personhood of trees is a commonly accepted notion in India Haberman was often told This tree is a person just like you and me Third this is not a study of isolated trees in some remote wilderness area but rather a study of trees in densely populated urban environments This is a study of trees who live with people and people who live with trees Fourth the trees examined in this book have been planted and nurtured by people for many centuries They seem to have benefited from human cultivation and flourished in environments managed by humans Fifth the book involves an examination of the human experience of trees of the relationship between people and trees Haberman is interested in people's sense of trees And finally the trees located in the neighborhood tree shrines of northern India are not controlled by a professional or elite class of priests Common people have direct access to them and are free to worship them in their own way They are part of the people's religion Haberman hopes that this book will help readers expand their sense of the possible relationships that exist between humans and trees By broadening our understanding of this relationship he says we may begin to think differently of the value of trees and the impact of deforestation and other human threats to trees Sacred Mushroom of
