Greenberg, Kerrie L. Hughes, 2010-12-07 Space the final frontier Or is it Many say there s no frontier more forbidding than a romantic relationship between a man and a woman But what if one s a human and the other s an alien Here is an original collection of space opera stories where authors take love unrequited or not on a spaceship space station or planetary colony and add enough drama confusion and mayhem to ensure that the path to true love or short term infatuation is seldom free of obstacles *Encyclopedia of Global Warming* Steven I. Dutch, 2010 Designed to provide students at the high school and undergraduate levels with a convenient source of information on the fundamental science and sociopolitical issues including the debates and controversies surrounding climate change The study of climate change involves not only scientists but also politicians policy makers businesses government and nongovernment agencies and the general public A student attempting to understand both the environmental science and social issues and controversies will encounter not just scientific terms and concepts but political organizations geographic areas social concepts persons countries organizations and laws as well The essays in the set fall into one or more of the following broad categories animals Arctic and Antarctic astronomy chemistry and geochemistry climatic events and epochs conferences and meetings cryology and glaciology diseases and health effects economics industries and products energy environmentalism conservation and ecosystems ethics human rights and social justice fossil fuels geology and geography laws treaties and protocols meteorology and atmospheric sciences nations and peoples oceanography organizations and agencies physics and geophysics plants and vegetation pollution and waste popular culture and society science and technology transportation and water resources Publisher *Timeshares* Jean Rabe, Martin H. Greenberg, 2010-03-02 Sixteen original stories about taking your dream vacation in any era you desire Take a vacation through time with the help of a Time Travel Agency offering excursions into the past and future Readers will find themselves in exotic adventurous locales and in all manner of trouble and mysteries And figures from the past will be able to squeak by the other way Picture Cleopatra in modern day New York City or Hannibal searching for elephants at Wisconsin s Circus World And that s just the beginning of the thrills and danger *Anthropocene Fictions* Adam Trexler, 2015-04-20 Since the Industrial Revolution humans have transformed the Earth s atmosphere committing our planet to more extreme weather rising sea levels melting polar ice caps and mass extinction This period of observable human impact on the Earth s

ecosystems has been called the Anthropocene Age The anthropogenic climate change that has impacted the Earth has also affected our literature but criticism of the contemporary novel has not adequately recognized the literary response to this level of environmental crisis Ecocriticism's theories of place and planet meanwhile are troubled by a climate that is neither natural nor under human control Anthropocene Fictions is the first systematic examination of the hundreds of novels that have been written about anthropogenic climate change Drawing on climatology the sociology and philosophy of science geography and environmental economics Adam Trexler argues that the novel has become an essential tool to construct meaning in an age of climate change The novel expands the reach of climate science beyond the laboratory or model turning abstract predictions into subjectively tangible experiences of place identity and culture Political and economic organizations are also being transformed by their struggle for sustainability In turn the novel has been forced to adapt to new boundaries between truth and fabrication nature and economies and individual choice and larger systems of natural phenomena Anthropocene Fictions argues that new modes of inhabiting climate are of the utmost critical and political importance when unprecedented scientific consensus has failed to lead to action Under the Sign of Nature Explorations in Ecocriticism
