Chapter 1 – The French Revolution

Before the French Revolution

Before the French revolution the French territories and society was like an ancient regime. They had feudal lords who had taken over the political system of the country. The French society was divided into three Estates. They were the clergy, the nobility and the peasants and workers. The upper two estates were closer to the royals and hence received favours easily. The others had to pay multiple taxes and had a life of suffering.

The Initial Stage of the Revolution

- When King Louis XVI sat on the throne, the financial condition of France was horrible.
- The king decided to convene the Estates-General to put more taxes upon the citizens on the Finance Minister's advice.
- The votes of the Estate General used to happen on a per Estate basis.
- The people of the Third Estate demanded that the votes should happen on a per head basis.
- The King did not agree with such a proposal so the representatives of the Third Estate walked out of the assembly.

The Tennis Court Oath

The representatives of the Third Estate formed a National Assembly where they tried to draft a constitution that would limit the powers of the monarchy. The King and the Clergy ultimately conceded to the National Assembly. The legislative powers then shifted from the hands of the King to the National Assembly. The newly created Legislative Assembly was divided into various political groups.

- The Constitutionalist
- The Republicans (The Girondins and The Jacobins)

The Rise of The Jacobins

Due to a war, France faced havoc. The Girondins lost power and the Jacobins became the rulers. They declared France a Republic but it lost its value when they turned tyrants. It was a brutal period of terror that the French had to face. Their

Student Notes from Latin Europe (1400-1750) Xander Feys,Maxime Maleux ,Andy Peetermans,Raf Van Rooy,2025-05-02 The first comprehensive guide dedicated solely to research on Latin European early modern student notes

The many preserved collections of student notes from the early modern period ranging from neatly maintained notebooks to barely legible scribbles crammed between lines of printed text hold considerable but largely untapped potential as an historical source. At the same time the analysis of these notes poses significant challenges for scholars. This book aims to be a concise and accessible companion for scholars interested in engaging with this young and burgeoning research field. Written by a diverse group of specialists from across Europe and the US it explores the various technical and practical aspects involved in reading, interpreting and editing student notes while also demonstrating how these sources can enrich various areas of historical research. Indeed student notes reveal that early modern lecture halls were often more dynamic, diverse and creative than we might have expected.
