History London Important Buildings Authorities:

Government Leaders, Military Rulers and Political Activists David W. Del Testa, 2014-01-27 In each volume an introductory essay outlines the history of the disciplines under discussion and describes how changes and innovations in these disciplines have affected our lives. The biographies that follow are organized in an A-Z format; each biography is divided into a life section describing the individual's life and influences and a legacy section summarizing the impact of that individual's work throughout history. These biographies cover a diverse group of men and women from around the globe and throughout history. Franklin D. Roosevelt, Mao Tse-tung, and Genghis Khan are among the 200 well-known historical figures included in this volume. Examples of other lesser-known yet important individuals covered in this work are Gustavus Adolphus, Swedish empire creator, Hatshepsut, queen of ancient Egyptian dynasty, and Jean Jaurès, French socialist leader and pacifist. Each synopsis provides information on each individual's enduring impact on the common understanding of fundamental themes of human existence.

The Construction of New Buildings Behind Historic Facades Mr David Highfield, 1991-03-14 Facade retention schemes are increasingly being used as a means of providing modern accommodation for commercial and industrial buildings in conservation areas and city centres. This book is the first authoritative guide to this highly complex technique and deals with the key issues associated with building behind historic facades. It explains the **Building by Local Authorities** Elizabeth Layton, 2021-03-23 Originally published in 1961, this is the report into an investigation of the forms of organization used by local authorities of many varied types, populations, and areas for the design and erection of new buildings and the maintenance of existing ones. It discusses the relations between Government departments and local authorities in the control of building design standards and costs and the part played by Council committees in the control of building operations. It examines the division of functions between Chief Officers responsible for different aspects of building work: architects, engineers, surveyors, and housing managers, and studies the use made of private architects and surveyors as well as the scope and organization of direct labour in local authority building.

Supervision and Authority in Industry Patricia Van den Eeckhout, 2009-08-01 The number of studies discussing the labour relationship under industrial capitalism is overwhelming, but the literature on labour and its concrete day-to-day shop-floor practices is much less abundant. How and by whom workers were supervised is one of the neglected aspects in the history of labour relations. After an insightful introductory chapter discussing the different forms of supervision in the United States, Britain, France, and Germany before the First World War, the case studies in this volume focus on foremen, vital but largely unstudied figures in the history of factory life, labour relations, and management. Illustrating the multiple faces of the foreman, the contributors examine the artisanal sector, textiles, mining, printing, engineering, heavy manufacturing, and car industries in Western Europe and show that the foreman was a multifaceted character who possessed technical expertise in addition to educational and organizational qualities. This comprehensive volume is further enhanced by comparisons with practices of supervision in

technikwissenschaftlichen Grundlagendisziplin die im 20. Jahrhundert in Gestalt der modernen Strukturmechanik bei der Herausbildung der konstruktiven Sprache des Stahl-Stahlbeton-Flugzeug-Automobil und des Schiffbaus eine tragende Rolle spielt. Dabei setzt der Autor den inhaltlichen Schwerpunkt auf die Formierung und Entwicklung moderner numerischer Ingenieurmethoden wie der Finite-Elemente-Methode und beschreibt ihre disziplinäre Integration in der Computational Mechanics. Kurze durch historische Skizzen unterstützte Einblicke in gängige Berechnungsverfahren erleichtern den Zugang zur Geschichte der Strukturmechanik und Erddrucktheorie vom heutigen Stand der Ingenieurpraxis und stellen einen auch einen wichtigen Beitrag zur Ingenieurpädagogik dar. Dem Autor gelingt es, die Unterschiedlichkeit der Akteure hinsichtlich ihres technisch-wissenschaftlichen Profils und ihrer Persönlichkeit plastisch zu schildern und das Verständnis für den gesellschaftlichen Kontext zu erzeugen. So werden in 260 Kurzbiografien die subjektive Dimension der Baustatik und der Strukturmechanik von der frühen Neuzeit bis heute entfaltet. Dabei werden die wesentlichen Beiträge der Protagonisten der Baustatik besprochen und in die nachfolgende Bibliografie integriert. Berücksichtigt wurden nicht nur Bauingenieure und Architekten, sondern auch Mathematiker, Physiker, Maschinenbauer sowie Flugzeug- und Schiffbauer. Neben den bekannten Persönlichkeiten der Baustatik wie Coulomb, Culmann, Maxwell, Mohr, Müller-Breslau, Navier, Rankine, Saint-Venant, Timoshenko und Westergaard wurden u.a. auch G. Green, A. N. Krylov, G. Li, A. J. S. Pippard, W. Prager, H. A. Schade, A. W. Skempton, C. A. Truesdell, J. A. L. Waddell und H. Wagner berücksichtigt. Den Wegbereitern der Moderne in der Baustatik J. H. Argyris, R. W. Clough, Th. v. Kármán, M. J. Turner und O. C. Zienkiewicz wurden umfangreiche Biografien gewidmet. Eine ca. 4500 Titel umfassende Bibliografie rundet das Werk ab. Neue Inhalte der 2. Auflage sind: Erddrucktheorie, Traglastverfahren, historische Lehrbuchanalyse, Stahlbrückenbau, Leichtbau, Platten und Schalentheorie, Greensche Funktion, Computerstatik, FEM, Computergestützte Graphostatik und Historische Technikwissenschaft. Gegenüber der 1. englischen Ausgabe wurde der Seitenumfang um 50 % auf nunmehr etwas über 1200 Druckseiten gesteigert. Das vorliegende Buch ist die erste zusammenfassende historische Gesamtdarstellung der Baustatik vom 16. Jahrhundert bis heute über die Reihe „Bautechnikgeschichte“. Mit erstaunlicher Dynamik hat sich die Bautechnikgeschichte in den vergangenen Jahrzehnten zu einer höchst lebendigen, international vernetzten und viel beachteten eigenständigen Disziplin entwickelt. Auch wenn die nationalen Forschungszugänge unterschiedliche Akzente setzen, eint sie doch das Bewusstsein, dass gerade die inhaltliche und methodische Vielfalt und das damit verbundene synthetische Potenzial die Stärke des neuen Forschungsfeldes ausmachen. Bautechnikgeschichte erschließt neue Formen des Verstehens von Bauen zwischen Ingenieurwesen und Architektur, zwischen Bau und Kunst, Technik und Wissenschaftsgeschichte. Mit der Edition „Bautechnikgeschichte“ erhält die neue Disziplin erstmals einen Ort für die Publik

National Approaches to the Governance of Historical Heritage Over Time Stefan Fisch, 2008. The five elements: governmental authorities, public discourse, corporate and market interests, citizens' associations and international agencies may help in figuring out the complex and challenging purpose of the research work presented in this volume, which is nothing

less than the history of the governance of cultural and natural heritage in eleven countries from its outset to the present Speaking about governance is challenging The term has been vastly used and misused But today when the feverish popularity of the concept is probably in decline we rest with one solid conviction at least that social economic cultural and institutional processes are governed not only through government be it national or local with its legislative administrative and jurisdictional mechanisms but through a larger array of different actors and factors These include schools and universities citizens associations public opinion economic corporations non governmental organizations learned societies unions media international agencies clubs consultants etc In fact the reader is going to meet quite a few of these actors in this publication they are the unavoidable characters involved in the story the authors have set out to tell **International Dictionary of Historic Places: Asia and Oceania** Trudy Ring,Robert M. Smith,2013-02-19 As an industrial process construction is unique in that the method of procurement of any built asset building infrastructure or process plant defines many of the subsequent management processes that take place during the building phase a very different situation to the purchase of goods and services in most other industries The procurement process is therefore central to the success of any construction project and many of the problems which impact construction projects can be traced back to the procurement phase so a good understanding of the methods of procurement and the influence it has on project success is essential for all those working in the industry Much has changed in the global construction industry since publication of the first edition of Building Procurement for example the global liquidity banking crisis and the debt burden of many major economies This new edition has been rewritten to take account of these significant developments but at its core it continues to provide a critical examination and review of current procurement practices in the UK continental Europe including EU procurement procedures China and the USA It retains its original strong emphasis on the need for clients to establish achievable objectives which reflect the project business case and focuses on development of suitable strategies and management structures to meet those objectives in the current construction climate Building Procurement will be essential reading for senior undergraduate and postgraduate students of construction management and practitioners working in all areas of construction management Review of the first edition a thorough and comprehensive investigation of building procurement Construction Management and Economics English Historical Documents D.B. Government of the World Martin Daunton,2023-11-14 Foreign Affairs Best Books of the Year 2023 An epic history of the
 people and institutions that have built the global economy since the Great Depression In this vivid landmark history the
 distinguished economic historian Martin Daunton pulls back the curtain on the institutions and individuals who have created
 and managed the global economy over the last ninety years revealing how and why one economic order breaks down and
 another is built During the Great Depression trade and currency warfare led to the rise of economic nationalism a retreat
 from globalization that culminated in war From World War II came a new liberal economic order Squarely reflecting the
 interests of the West in the Cold War liberalism faced collapse in the 1970s and was succeeded by neoliberalism
 financialization and hyper globalization Now as leading nations are tackling the fallout from Covid 19 and threats of inflation
 food insecurity and climate change Daunton calls for a return to a more just and equitable form of globalization Western
 imperial powers have overwhelmingly determined the structures of world economic government often advancing their own
 self interests and leading to ruinous resource extraction debt poverty and political and social instability in the Global South
 He argues that while our current economic system is built upon the politics of and between the world s biggest economies a
 future of global recovery and the reduction of economic inequality requires the development of multilateral institutions
