CD8 T cells Th17 cells and d T cells are reduced while regulatory T cells increase At the same time T lymphocytes and neutrophils as immune effector cells interact with each other and play a key role in regulating the immune response to immune inflammatory diseases The increased release of neutrophil extracellular trap networks NETs by neutrophils leads to a significant upregulation of NETs DNA MPO which further aggravates the septic inflammatory response and organ functional impairment Therefore it is important to deeply investigate the characteristic clinical immune phenotypes and molecular mechanisms associated with inflammatory diseases and targeting therapies against them may provide new ideas for the precise treatment of diseases The goal of this Research Topic is to provide a forum to advance research on the contribution of the fundamental mechanisms of immune system development and function with special emphasis on the description and mechanism of clinical immunological phenotypes in different immune disorders and the definition of their molecular basis The Research Topic had the bullet points including but not limited to the following 1 Description of the immune phenotypes of various common acute and chronic diseases 2 The regulatory mechanisms of different factors on the development and function of the host immune system 3 Inflammatory immunological mechanisms organ function and interorgan interactions **Filmmakers** ,1979 Road and Track ,1977 *Popular Science* ,1976-10 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better *Popular Science* ,1976-03 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better *Popular Science* ,1977-01 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Technical Report Series** ,2008 *Hepato-gastroenterology* ,2008 **Popular Electronics** ,1981
