She situates the lab's work within broader Chinese history as well as the contemporary cultural and political moment in which declining fertility rates and reproductive governance and technology are growing concerns. She also points to how toxicology in China is a transnational endeavor tied to both local conditions and international research agendas and infrastructures which highlights the myriad scales and scope of epigenetic environments. At a moment of growing concerns about toxins, endocrine disrupting chemicals, and climate change, Lamoreaux demonstrates that epigenetic research's proliferation of environments produces new kinds of toxic relations that impact multiple generations of humans. **Making**

Life Work Jack Levinson, *Group homes* emerged in the United States in the 1970s as a solution to the failure of the large institutions that for more than a century segregated and abused people with intellectual and developmental disabilities. Yet community services have not for the most part delivered on the promises of rights, self-determination, and integration made more than thirty years ago, and critics predominantly portray group homes simply as settings of social control. *Making Life Work* is a clear-eyed ethnography of a New York City group home based on more than a year of field research. Jack Levinson shows how the group home needs the knowledgeable and voluntary participation of residents and counselors alike. The group home is an actual workplace for counselors, but for residents, group home work involves working on themselves to become more autonomous. Levinson reveals that rather than being seen as the antithesis of freedom, the group home must be understood as representing the fundamental dilemmas between authority and the individual in contemporary liberal societies. No longer inmates but citizens, these people who are presumed rightly or wrongly to lack the capacity for freedom actually govern themselves. Levinson, a former group home counselor, demonstrates that the group home depends on the very capacities for independence and individuality it cultivates in the residents. At the same time, he addresses the complex relationship between services and social control in the history of intellectual and developmental disabilities, interrogating broader social service policies and the role of clinical practice in the community. **Holt Science and Technology**

Holt, Rinehart & Winston, 2007. *Intelligent Computing* Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2018-11-01. This book, gathering the Proceedings of the 2018 Computing Conference, offers a remarkable collection of chapters covering a wide range of topics in intelligent systems, computing, and their real-world applications. The Conference attracted a total of 568 submissions from pioneering researchers, scientists, industrial engineers, and students from all around the world. These submissions underwent a double-blind peer review process. Of those 568 submissions, 192 submissions, including 14 poster papers, were selected for inclusion in these proceedings. Despite computer science's comparatively brief history as a formal academic discipline, it has made a number of fundamental contributions to science and society. In fact, along with electronics, it is a founding science of the current epoch of human history, the Information Age, and a main driver of the Information Revolution. The goal of this conference is to provide a platform for researchers to present fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences. This book collects state-of-the-art

chapters on all aspects of Computer Science from classical to intelligent It covers both the theory and applications of the latest computer technologies and methodologies Providing the state of the art in intelligent methods and techniques for solving real world problems along with a vision of future research the book will be interesting and valuable for a broad readership
