Modern World History: Patterns of Interaction Holt McDougal,2005-01 *The Patchwork of World History in Texas High Schools* Stephen Jackson,2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States *Course of Study in History, Geography, and the Other Social Studies for the Senior and Junior High Schools* District of Columbia. Beck, McDougal Littell, 2005 **War, Nation, Memory** Keith A. Crawford, Stuart J. Foster, 2007-12-01 The Second World War stands as the most devastating and destructive global conflict in human history More than 60 nations representing 1.7 billion people or three quarters of the world's population were consumed by its horror Not surprisingly therefore World War II stands as a landmark episode in history education throughout the world and its prominent place in school history textbooks

is almost guaranteed As this book demonstrates however the stories that nations choose to tell their young about World War II do not represent a universally accepted truth about events during the war Rather wartime narratives contained in school textbooks typically are selected to instil in the young a sense of national pride common identity and shared collective memory To understand this process War Nation Memory describes and evaluates school history textbooks from many nations deeply affected by World War II including China France Germany Japan USA and the United Kingdom It critically examines the very different and complex perspectives offered in many nations and analyses the ways in which textbooks commonly serve as instruments of socialisation and in some cases propaganda Above all War Nation Memory demonstrates that far from containing neutral knowledge history textbooks prove fascinating cultural artefacts consciously shaped and legitimated by powerful ideological cultural and sociopolitical forces dominant in the present
