Manuscript Recipe Books as Archaeological Objects Madeline Shanahan, 2014-11-18 During the mid to late seventeenth century women in Irish houses from elite backgrounds started to collect recipes which they recorded in domestic manuscripts While these manuscripts were made elsewhere at an earlier date they were an almost entirely new arrival to Ireland in this period and their sudden proliferation said much about changes taking place in society at large This book is a detailed study of such manuscripts from the perspective of historical archaeology which will argue that they are artifacts which clearly demonstrate that a profound series of changes was taking place The written word penetrated people's daily lives and homes to a degree that it had not in previous periods and it had a profound influence on how they related to their world objects and each other While this book will address how we can use them as sources for the study of food history and material culture it is ultimately concerned with the meanings of manuscript recipe books and specifically what they say about the individuals and society that made them The proliferation of these manuscripts signaled a profound change not just in cuisine but also in the way people thought about and related to food as a form of material culture Ultimately this book will argue that these manuscripts are not simply excellent records which can tell us about material culture within the early modern house but that they are a profoundly important type of artifact in their own right Undertaking research that situates textual objects such as recipe books at the very core of historical archaeology is critical to understanding some of the most significant changes that took place in the early modern world

Consumer Culture in Ireland, 1922-1962 Stephanie Rains,2022-08-13 This book explores advertising and consumer culture as key aspects of everyday life and national culture in twentieth century Ireland It makes a particular argument that the presence of anti materialist rhetoric in some parts of Irish public life after Independence has obscured the existence of a lively consumer culture throughout the period as evident in the many advertisements which supported Irish newspapers and magazines the jingles broadcast on Irish radio and the neon advertising signs and billboards on Irish streets The book focuses on the development of the advertising industry itself and the sophisticated ways in which it worked to associate consumption with national pride It also considers the advertising of Irish homes and home appliances as an important focus of consumption and the targeting of Irish women as the principal consumers in those homes as well as publicity stunts and advertising in public space and the form and style of commercial broadcasting and sponsored programming from the earliest days of Irish radio It finishes with an examination of the opposite extremes of consumer abundance displayed in the annual Christmas advertising as opposed to the consumer culture response to shortages during World War Two *My Irish Table*
